The Chicago:

The Chicago Trunk Murder Elizabeth Dale, 2011-09-01 On November 14 1885 a cold autumn day in the City of Broad Shoulders an enthusiastic crowd of several hundred watched as three Sicilians Giovanni Azari Agostino Gelardi and Ignazio Silvestri were hanged in the courtyard of the Cook County Jail The three had only recently come to the city but not long after they were arrested tried and convicted for murdering Filippo Caruso stuffing his body into a trunk and shipping it to Pittsburgh Historian and legal expert Elizabeth Dale brings the Trunk Murder case vividly back to life painting an indelible portrait of nineteenth century Chicago ethnic life there and a murder trial gone seriously awry Along the way she reveals a Windy City teeming with street peddlers crooked cops earnest reformers and legal activists all of whom play a part in this gripping tale The Chicago Trunk Murder shows how the defendants in the case were arrested on dubious evidence and held some for weeks without access to lawyers or friends The accused finally confessed after being interrogated repeatedly by men who did not speak their language They were then tried before a judge who had his own view and ruled accordingly The Chicago Trunk Murder revisits these abject breaches of justice and uses them to consider much larger problems in late nineteenth century criminal law Written with a storyteller's flair for narrative and brimming with historical detail this book will be must reading for true crime buffs and aficionados of Chicago lore alike

How the Chicago School Overshot the Mark Robert Pitofsky, 2008-10-14 How the Chicago School Overshot the Mark is about the rise and recent fall of American antitrust It is a collection of 15 essays almost all expressing a deep concern that conservative economic analysis is leading judges and enforcement officials toward an approach that will ultimately harm consumer welfare For the past 40 years or so U S antitrust has been dominated intellectually by an unusually conservative style of economic analysis Its advocates often referred to as The Chicago School argue that the free market better than any unelected band of regulators can do a better job of achieving efficiency and encouraging innovation than intrusive regulation The cutting edge of Chicago School doctrine originated in academia and was popularized in books by brilliant and innovative law professors like Robert Bork and Richard Posner Oddly a response to that kind of conservative doctrine may be put together through collections of scores of articles but until now cannot be found in any one book This collection of essays is designed in part to remedy that situation The chapters in this book were written by academics former law enforcers private sector defense lawyers Republicans and Democrats representatives of the left right and center Virtually all agree that antitrust enforcement today is better as a result of conservative analysis but virtually all also agree that there have been examples of extreme interpretations and misinterpretations of conservative economic theory that have led American antitrust in the wrong direction The problem is not with conservative economic analysis but with those portions of that analysis that have overshot the mark producing an enforcement approach that is exceptionally generous to the private sector If the scores of practices that traditionally have been regarded as anticompetitive are ignored or not subjected to vigorous enforcement prices will be higher quality of

products lower and innovation diminished In the end consumers will pay Internal Revenue Acts of the United States, 1909-1950 Bernard D.
