The Essential C-Section Guide Maureen Connolly, Dana Sullivan, 2008-12-10 Childbirth is a life altering experience for any woman but a Cesarean delivery can be overwhelming whether it s unexpected or planned Despite the fact that roughly one in four babies in the United States is delivered by c section very little information about the experience is included in typical pregnancy books and physicians and childbirth educators often gloss over the details The *Essential C Section Guide* is written not only for women to read in preparation for a scheduled c section and for those considered high risk who know that a c section may become necessary but also for women recovering from an unexpected surgical delivery This book provides answers to important questions about what the surgery entails what a woman can expect as she recovers and what considerations should be made for future pregnancies and deliveries With frank discussions about the physical and emotional aspects surrounding a c section the authors share comforting wisdom about early bonding pain control breastfeeding infant care healing from surgery postpartum exercise partner involvement and much more in detail not available anywhere else Written by authors who have firsthand knowledge of birth by c section The *Essential C Section Guide* is well researched and addresses its unique concerns with intelligence and compassion www.broadwaybooks.com

First Time Mothers'™ Experiences of a Planned Cesarean Birth Denise Puia, 2015

The elevated cesarean birth rate continues to be an issue of concern Many of these births are to first time mothers Numerous studies have been conducted to examine specific physiological or psychological complications of a cesarean birth Yet little research has been done to qualitatively explore the overall experience of women having a cesarean birth and none have focused exclusively on first time mothers experience of a planned cesarean birth The purpose of this narrative analysis of

first time mothers planned cesarean birth stories was to gain insight into the entire physical and emotional response to the cesarean birth experience beginning with the preceding factors that influenced the women to have a planned cesarean birth including the birth itself and concluding with the recovery and postpartum period Narrative analysis is a type of qualitative design in which the participants story is the object of inquiry A convenience sample of 11 first time mothers who underwent a planned cesarean birth was interviewed either by email or face to face The data were analyzed using Reissman s method of thematic narrative analysis Each narrative was analyzed as a whole and the results were discussed within the theoretical framework of Roy s Adaptation Model to produce thematic categories Similarities were identified and used to create a metastory which revealed seven overarching themes Decision not much of a choice Acceptance of birth method Emotional roller coaster of birth Physical recovery feeling like myself Emotional recovery a kaleidoscope of feelings Expectations a picture in my mind Outcomes ties that bind This study reveals valuable clinical implications Healthcare providers need to work to improve policies to decrease maternal infant separation during the cesarean birth Education needs to be provided to the woman and her support person to decrease fears and help create realistic expectations This study will guide providers to make improvements in providing holistic maternity care specific to first time mothers having a planned cesarean birth Recommendations are made for clinical practice education and research Increased education and support can lead to a positive experience despite having an alternative birth method
