The Kamikazes:

The Kamikazes Edwin Palmer Hoyt, 1984 The Kamikazes Charles River Charles River Editors, 2018-02-24 Includes pictures Includes diary entries and other accounts written by kamikaze pilots Includes a bibliography for further reading One of the most fascinating aspects of World War II was Japan's use of suicide pilots known around the globe as kamikazes though the Japanese referred to them as Tokubetsu kogeitai Special Attack Units Translated as God Wind Divine Wind and God Spirit kamikazes would sink 47 Allied vessels and damage over 300 by the end of the war but the rise in the use of kamikaze attacks was evidence of the loss of Japan's air superiority and its waning industrial might This method of fighting would become more common by the time Iwo Jima was fought over in early 1945 and it was especially prevalent during the invasion of Okinawa in April 1945 The privilege of being selected as a kamikaze pilot played directly into the deep seated Japanese mindset of death before defeat The pilot training manual assured each kamikaze candidate that when they eliminated all thoughts of life and death fear of losing the earthly life can be easily overcome Still not all cases of those chosen to be kamikazes were equally noble Recruits were trained with torturous regimens or corporal punishment and stories of mental impairment caused by drugs or saki abound Some were described as tottering and dazed being carried to their planes by maintenance officers and forcibly pushed in if they backed down Pilots who could not find their targets were told to turn around and spare their own lives for another day but if a pilot returned nine times he was to be shot At the moment of collision he was instructed to keep his eyes open at all times and to shout Hissatsu clear kill Altogether nearly 4 000 kamikaze pilots died in combat between October 1944 and August 1945 and about one in seven managed to hit his target At their peak they did far more damage to the American Navy than did conventional air attacks and they undoubtedly placed a significant new obstacle in the path of the American forces slowly encircling the Japanese home islands However the widespread use of kamikaze tactics darkened and hardened attitudes toward Japan within the American military and helped to set the stage for the total war on Japanese civilians that the American military waged in the closing months of the war The Marine Corps Gazette noted The ruthless atrocities by the Japanese throughout the war had already brought on an altered behavior deemed so by traditional standards by many Americans resulting in the desecration of Japanese remains but the Japanese tactic of using the Okinawan people as human shields brought about a new aspect of terror and torment to the psychological capacity of the Americans As one sailor aboard the USS Miami recalled about kamikaze attacks at Okinawa They came in swarms from all directions The barrels of our ship's guns got so hot we had to use firehoses to cool them down The kamikazes were the most effective weapon the Japanese had in terms of sinking ships but they only appeared in the final year of the war The fact that Japan's military leadership concluded it was both necessary and justified to establish special units of pilots trained to sacrifice their own lives by crashing their planes into enemy vessels was a mark of their own desperation In the heat of battle individual soldiers occasionally risked certain or near certain death to protect their

comrades or advance their mission but organized units devoted to suicide tactics were virtually unknown before 1944. They appeared only once the course of the war had turned decidedly against the Japanese. The Kamikazes chronicles the history of Japan's famous suicide pilots and explains when, why, and how Japan resorted to their use near the end of war. Along with pictures of important people, places, and events, you will learn about the kamikazes like never before.

[The Kamikaze Campaign 1944-45](#) Mark Lardas, 2022-05-26. An illustrated history of how Japan devised and launched a new kind of air campaign in late 1944: the suicidal assaults of the kamikaze units against the approaching Allied fleets. As summer changed to autumn in 1944, Japan was losing the war. Still unwilling to surrender, Japan's last hope was to try to wear down US resolve enough to reach a negotiated settlement. Extraordinary measures seemed necessary, and the most extraordinary was the formation of Special Attack Units known to the Allies as the kamikazes. The concept of organized suicide squadrons was first raised on June 15, 1944. By August, formations were being trained. These formations were first used in the October 1944 US invasion of the Philippine Islands, where they offered some tactical success. The program was expanded into a major campaign over the rest of the Pacific War, seeing a crescendo during the struggle for Okinawa in April through May 1945. This highly illustrated history examines not just the horrific missions themselves but the decisions behind the kamikaze campaign: how it developed and how it became a key part of Japanese strategy. Although the attacks started on an almost ad hoc basis, the kamikaze soon became a major Japanese policy. By the end of the war, Japan was manufacturing aircraft specifically for kamikaze missions, including a rocket-powered manned missile. A plan for a massive use of kamikazes to defend the Japanese Home Islands from invasion was developed but never executed because of Japan's surrender in August 1945. Packed with diagrams, maps, and 3D reconstructions of the attacks, this book also assesses the Allied mitigation techniques and strategies and the reasons and the degree to which they were successful.

Divine Thunder; the Life and Death of the Kamikazes Bernard Millot, 1971. Describes the origins and devastating attacks of the Japanese suicide pilots and their planes during World War II. Topics discussed include Bushido Code, Great Divine Mission, Admiral Arima's Example, Yamato Unit, Shikishima Unit, Admiral Onishi's Victory, Iwo Jima, The Tan operation, Ohka, Koryu, Kairyu, Kaiten, Torpedo, Kikumizu Unit, Kongo Unit, Kaitens at Iwo Jima, Shinyo, Kikusui Forces, Tokubetsu Units, Operatino Ten go, Kikusui Assaults, Tokubetsu Units, End of Okinawa, Tsurugi, Nakajima, Kikka, Baika, Strange, Shinryu, Admiral Ugaki's Sacrifice, Onishi's End.

[Desperate Sunset](#) Mike Yeo, 2019-12-26. In a last desperate bid to stave off defeat, Japan's High Command launched the terrifying kamikaze attacks. By the middle of 1944, Imperial Japan's armed forces were in an increasingly desperate situation. Its elite air corps had been wiped out over the Solomons in 1942-43, and its navy was a shadow of the force that had attacked Pearl Harbor in 1941. But the Japanese had one last desperate card to play. The Japanese High Command decided that the way to inflict maximum damage on the superior enemy forces was to get the poorly trained Japanese pilots to crash their explosive-laden aircraft onto their target, essentially turning themselves into a guided missile. The kamikazes announced themselves in the immediate

aftermath of the Leyte Gulf naval battles sinking the USS St Lo and damaging several other ships The zenith of the kamikaze came in the battle of Okinawa which included ten kikusui Floating Chrysanthemum operations which involved up to several hundred aircraft attacking the US fleet Fully illustrated throughout Desperate Sunset examines the development and evolution of the kamikaze using first hand accounts combat reports and archived histories Kamikaze Attacks of World War II Robin L. Rielly,2010 This book details more than 400 kamikaze attacks performed by Japanese aircraft manned torpedoes suicide boats and suicide swimmers against U S ships during World War II Part One focuses on the traditions development and history Part Two details the kamikaze attacks on ships Appendices list all of the U S ships suffering kamikaze attacks Provided by publisher *MacArthur's Airman* Thomas E.
