## **The Temple Wall:**

**The Southern Wall of the Temple Mount and Its Corners** Yuval Baruch, Ronny Reich, Moran Hagbi, Joe Uziel, 2023-12-12 The Temple Mount compound known in Arabic as the Haram al-Sharif situated on the east side of the Old City of urban Jerusalem is a majestic and holy site that has been venerated by millions for more than two thousand years. The compound's interior has been out of bounds to Western archaeologists for over a century and modern researchers have therefore concentrated their efforts on the massive ancient stone walls that surround it. The third volume in the Ancient Jerusalem Publication series *The Southern Wall of the Temple Mount and Its Corners Past Present and Future* concentrates on the southern retaining wall of the Herodian Temple Mount in Jerusalem, its two corners, and Robinson's Arch on the southern edge of the Western Wall. It presents the final reports of three excavations carried out adjacent to the wall and one under Robinson's Arch. Among the many new interpretations, the excavators present intriguing theories regarding the engineering of an ancient ramp for herding sacrificial animals up to the Temple Mount and a new reading of an Isaiah 66:14 graffito. The volume devotes a large section to conservation projects carried out in order to understand the problems causing the deterioration of the stones in the southern part of the Western Wall and find solutions to protect and preserve them. The volume also presents details of a major ground penetrating radar examination of this stretch of the Western Wall.

**The Temple of Ramesses II in Abydos** Sameh Iskander, Ogden Goelt, 2022-04-12 Of all the enormous monuments throughout Egypt and Nubia that Ramesses II the Great ca. 1279-1212 BCE left behind, his temple at Abydos, built early in his reign, stands as one of his most elegant with its simple architectural layout and dramatic and graceful painted relief scenes. Though best known for its dramatic reliefs depicting the battle of Kadesh, the temple also offers a wealth of information about religious and social life in ancient Egypt. It reflects, for example, the strenuous efforts of the early Ramessides to reestablish the Osiris cult in Egypt and particularly at Abydos in the aftermath of the Amarna period. Building on the comprehensive photographic and epigraphic documentation of the temple presented in *The Temple of Ramesses II at Abydos* volumes 1 Wall Scenes and 2 Pillars, Niches and Miscellanea, volume 3 *Architectural and Inscriptional Features* offers a detailed analysis of the overall architectural layout and decorative program of the temple and its symbolism. This discussion approaches the religious history of the site through its archaeology, its inscriptions (both planned and secondary graffiti), and its situation in the complex religious landscape of Abydos. Of particular interest are the temple's role as a staging point for the great Osiris Festival and its procession among the most important of all ritual events in the Egyptian religious calendar during the Ramesside period; the promotion of an active, unbound form of Osiris; and the evidence for important cult activities that took place on the rooftop of the temple, the presence of which is documented today by the staircase that accessed it from Court B.

**The Temples of Soli** Alfred Westholm, 1936      **Temples and Sanctuaries in the Roman East** Arthur Segal, 2013-10-31 This lavishly illustrated volume presents a comprehensive architectural study of 87 individual temples and

sanctuaries built in the Roman East between the end of the 1st century BCE and the end of the 3rd century CE within a broad region encompassing the modern states of Syria Lebanon Israel and Jordan Religious architecture gave faithful expression to the complexity of the Roman East and to its multiplicity of traditions pertaining to ethnic and religious aspects as well as to the powerful influence of Imperial Rome The source of this power lay in the uniformity of the architectural language the inventory of forms the choice of styles and the spatial layout of the buildings Thus while temples have an eclectic character there is an underlying unity of form comprising the podium the stairway between the terminating walls antae and the columns along the entrance front in other words the axiality frontality and symmetry of the temple as viewed from outside The temples and sanctuaries studied in this volume demonstrate individual nuances of plan spatial design location in the sanctuary and interrelations with the immediate vicinity but can be divided into two main categories Vitruvian temples derived from Hellenistic Roman architecture and Non Vitruvian temples those with plans and spatial designs that cannot be analysed according to architectural criteria such as those defined by Vitruvius The individual descriptions presented focus solely upon the analysis of the external and internal space of the temples of all types and do not involve any cultural or ethnic discussion

**A Report on the Temples of Philae** Egypt. Maṣlaḥat al-Misāḥah, Sir Henry George Lyons, Henry George Lyons, 1908 **The Inclusive Bible** Priests for Equality, 2009-03-16 While this new Bible is certainly an inclusive language translation it is much more it is a re imagining of the scriptures and our relationship to them Not merely replacing male pronouns the translators have rethought what kind of language has built barriers between the text and its readers Seeking to be faithful to the original languages they have sought new and non sexist ways to express the same ancient truths The Inclusive Bible is a fresh dynamic translation into modern English carefully crafted to let the power and poetry of the language shine forth particularly when read aloud giving it an immediacy and intimacy rarely found in traditional translations of the Bible The Inclusive Bible contains both the Old and the New Testaments *The Holy Bible According to the Authorized Version (a.D. 1611): Ezekiel to the Minor Prophets. 1892 ,1892* *The Temple Mount and the Western Wall in Israeli Law* Shmuel Berkovitz, 2001 **The XIth Dynasty Temple at Deir El-Bahari** Edouard Naville, 1910
