Triumph Of Technology:

The Triumph of Technology Alec Broers,2005-11-03 The Triumph of Technology is taken from Lord Alec Broers 2005 BBC Reith Lectures on the role and importance of technology in our lives The lectures discuss the way technology has shaped life since the beginnings of civilization explaining how we owe to technologists most of what drives our world today how technologies develop and the excitement of the modern creative process There are some who believe that technology s future development should be controlled and that it may already have gone too far especially in areas such as the use of energy something which has the potential to permanently harm our environment Alec Broers argues that although we need to understand such dangers and use technology wisely it can improve our lives that we must look to technology to solve many of the problems that threaten our planet Included here are the complete lectures plus a new introduction and conclusion

Technology as Magic Richard Stivers,Peter Stirk,2001-08-01 What gives the mass media particularly advertising and television their extraordinary power over our lives so that even the most jaded and sophisticated among us are troubled and fascinated by their allure The secret according to Richard Stivers in this brilliant new book lies in the curious relationship between technology and magic Stivers argues the two are now related to one another in such a way that each has taken on important characteristics of the other His contention is that our expectations for technology have become magical to the point that they have generated a multitude of imitation technologies that function as magical practices These imitation technologies flourish in the fields of psychology management administration and the mass media and their paramount purpose in human adjustment and control Advertising and television programs in particular contain the key magical rituals of our civilization In a fascinating analysis of television programming Stivers shows how various genres news sports game shows soap operas sitcoms etc have their distinct mythological symbols Through dramatized information they symbolically connect consumer goods and services to desired outcomes the utopian goals of success happiness and health thus enveloping technology both real and imitation in a magical cocoon

The Triumph of Technology Hasan Ozbekhan,SYSTEM DEVELOPMENT CORP SANTA MONICA CALIF.,1967 The theme of this paper which is really part of a larger general subject

that might be called The Quality of Life in the Future will be discussed in terms of normative planning Without dwelling on preliminaries during which definitions would need to be established assumptions ordered and clarifications semantic as well as logical provided so that the argument following can be glued together as tightly and neatly as possible this discussion will move directly to the somewhat special perspective of planning Such a perspective may help to organize a number of surrounding points into a pattern in ways that are not always obvious and in terms of a frame of relationships that may lead to some interesting conjectures Author Technology Review ,1922 Technology as Magic Richard Stivers, Stivers argues that our expectations of technology in society have led to the generation of a multitude of imitation technologies that function as magical practices once did The Development of Civilization Harry J.
