**The Fall of the Wild** Ben A. Minteer, 2018-12-11 The passenger pigeon the great auk the Tasmanian tiger the memory of these vanished species haunts the fight against extinction Seeking to save other creatures from their fate in an age of accelerating biodiversity loss wildlife advocates have become captivated by a narrative of heroic conservation efforts A range of technological and policy strategies from the traditional such as regulations and refuges to the novel the scientific wizardry of genetic engineering and synthetic biology seemingly promise solutions to the extinction crisis In *The Fall of the Wild* Ben A. Minteer calls for reflection on the ethical dilemmas of species loss and recovery in an increasingly human driven world He asks an unsettling but necessary question Might our well meaning efforts to save and restore wildlife pose a threat to the ideal of preserving a world that isn't completely under the human thumb Minteer probes the tension between our impulse to do whatever it takes and the risk of pursuing strategies that undermine our broader commitment to the preservation of wildness From collecting wildlife specimens for museums and the wilderness aspirations of zoos to visions of assisted colonization of new habitats and high tech attempts to revive long extinct species he explores the scientific and ethical concerns vexing conservation today *The Fall of the Wild* is a nuanced treatment of the deeper moral issues underpinning the quest to save species on the brink of extinction and an accessible intervention in debates over the principles and practice of nature conservation

**What's New? The Zoo!: A Zippy History of Zoos** Kathleen Krull, 2014-06-24 With friendly facts funny pictures and animals galore What's New The Zoo is history to roar for Did you know The first zoo was established forty three hundred years ago in what is now Iraq Aztec King Moctezuma II had such an incredible collection of animals that it took six hundred men and women to care for them Children across Great Britain wrote to Queen Victoria when Jumbo the elephant was sold away from the London Zoo Fifty buffalo passed through Grand Central Station in 1907 on their way to the Bronx Zoo Zoos now play a crucial role in animal conservation Kathleen Krull and Marcellus Hall bring witty insight jazzy style and a globe trotting eye to our millennia long history of keeping animals and the ways animals have changed us in turn

**The Disneyfication of Animals** Rebecca Rose Stanton, 2020-09-17 This book critically examines how Walt Disney Animation Studios has depicted and sometimes failed to depict different forms of harming and objectifying non human animals in their films Each chapter addresses a different form of animal harm and objectification through the theories of speciesism romanticism and the collapse of compassion effect from farming hunting and fishing to clothing work and entertainment Stanton lucidly presents the dichotomy between depictions of higher order anthropomorphised and neotonised animal characters and that of lower order species showing furthermore how these depictions are closely linked to changing social attitudes about acceptable forms of animal harm An engaging and novel contribution to the field of Critical Animal

Studies this book explores the use of animals not only in Disney's best known animated films such as 101 Dalmatians but also lesser known features including Home on the Range and Fun and Fancy Free. A quantitative appendix supplying data on how often each animal species appears and the amount of times animal harm or objectification is depicted in over fifty films provides an invaluable resource and addition to scholars working in both Disney and animal studies. *The Ark and Beyond* Ben A. Minteer, Jane Maienschein, James P. Collins, 2018-02-23 Scores of wild species and ecosystems around the world face a variety of human caused threats from habitat destruction and fragmentation to rapid climate change. But there is hope and it too comes in a most human form: zoos and aquariums. Gathering a diverse multi-institutional collection of leading zoo and aquarium scientists as well as historians, philosophers, biologists, and social scientists, *The Ark and Beyond* traces the history and underscores the present role of these organizations as essential conservation actors. It also offers a framework for their future course, reaffirming that if zoos and aquariums make biodiversity conservation a top priority, these institutions can play a vital role in tackling conservation challenges of global magnitude. While early menageries were anything but the centers of conservation, that many zoos are today a concern with wildlife preservation has been an integral component of the modern, professionally run zoo since the nineteenth century. From captive breeding initiatives to rewilding programs, zoos and aquariums have long been at the cutting edge of research and conservation science, sites of impressive new genetic and reproductive techniques. Today their efforts reach even further, beyond recreation with educational programs, community-based conservation initiatives, and international collaborative programs designed to combat species extinction and protect habitats at a range of scales. Addressing related topics as diverse as zoo animal welfare, species reintroductions, amphibian extinctions, and whether zoos can truly be wild, this book explores the whole range of research and conservation practices that spring from zoos and aquariums while emphasizing the historical scientific and ethical traditions that shape these efforts. Also featuring an inspiring foreword by the late George Rabb, president emeritus of the Chicago Zoological Society Brookfield Zoo, *The Ark and Beyond* illuminates these institutions' growing significance to the preservation of global biodiversity in this century. Zoos K. Lee, 2005-11-22 In this book Keekok Lee asks the question: what is an animal and how does our treatment of it within captivity affect its status as a being? This ontological treatment marks the first such approach in looking at animals in captivity. Engaging with the moral questions of zoo keeping, is it morally justified to keep a wild animal in captivity as well as the ontological, what is it that we conserve in zoos after all? A wild animal or its shadow? Lee develops her own original hypothesis centered around the concept of immuration, defining this in contrast to domestication and thereby providing a unique addition to the growing body of work on animal ethics. *Life*, 1908 *Handbook of Public Pedagogy* Jennifer A.
