*Trends in Personalized Nutrition* Charis M. Galanakis, 2019-05-23 *Trends in Personalized Nutrition* explores the topic of personalized nutrition from multiple angles addressing everything from consumer acceptance to policies and cognitive dissonance. Sections in the book cover epigenetics, nutrigenomics, predicting glycemic response and metabolomics, and the role of bacteria. In addition, the book explores diet, obesity, and personalized nutrition for athletes, women, and infants and children, along with a section on the role of modern technology in the promotion of personalized nutrition. Nutritionists, food technologists, food chemists, new product developers, academics, and researchers, and physicians working in the field of nutrition will find this to be a great reference. Addresses consumer acceptance, policies, and cognitive dissonance in nutrition. Discusses epigenetics, nutrigenomics, how to predict glycemic response and metabolomics, and the role of bacteria. Explores diet and obesity. Considers personalized nutrition for athletes, women, infants, and children. Contemplates the role of modern technology in personalized nutrition.

**Nutrition Accuracy in Popular Magazines (2004-05)**, **Food Products Evolution: Innovation Drivers and Market Trends** Angela Tarabella, 2019-06-29 Modern awareness of nutrition issues can be understood correctly if considered the destination of a historic journey, the critical aspects and outcomes of which have led to the current situation. In fact, over time, there have been changes to scientific knowledge, food availability, and processing and preservation methods. Commercial exchange has increased considerably between the countries of the world, so much so that it has defined a completely different scenario to the past and has influenced food availability, distribution, models, preservation methods, and the composition of individual foodstuffs. The products consumed on a daily basis throughout the world in industrialized countries have undergone review by the food industry, incorporating great aspects of innovation that make them highly different in their structure, content, and even the packaging that protects and contains them. After covering the subject of innovation in the food sector, this Brief of work will discuss the various first and second generation product categories distributed in Europe, starting from the period of post-war reconstruction, in order to illustrate the reasons that led to their birth and development on the market. Specific examples are shown for each proposed class, including highlights of their properties, technologies, innovation potential, related regulations, and distinctive features.
