Green Buildings Jerry Yudelson, 2020-12-17 Engineers, architects and contractors seeking to expand their involvement in the green buildings market need a firm grounding in the marketing strategies and tactics which are being used most successfully in this specialized and growing field. This book is intended to serve as an effective tool for professional green building enthusiasts and advocates in presenting green design features, sustainable strategies and new products to the potential green building client. The author addresses key questions such as: How is green building marketing different from other types of professional service marketing? What tools and techniques from conventional marketing can be used to greater effect in marketing green buildings? What is the size and potential of the green buildings market? And how should a firm position itself to succeed in this growing marketplace? You will find clear descriptions of successful strategies and approaches to marketing and selling green building related services as well as up to date information on the role of LEED in green building projects.

The Engineering Guide to LEED-New Construction: Sustainable Construction for Engineers (GreenSource) Liv Haselbach, 2010-08-09 An Up to Date Guide to the Latest LEED New Construction Guidelines. Fully revised for version 3.0 of the LEED New Construction rating system. LEED 2009, this GreenSource book helps you acquire the skills needed to apply LEED NC to sustainable construction projects. The Engineering Guide to LEED New Construction second edition offers comprehensive coverage of the environmental systems and impacts on which many of the LEED NC subcategories are based. Detailed equations and exercises in the book can be used to perform the calculations outlined in LEED NC. Valuable information on real world applications of LEED NC in military, low impact development, LID and other sectors is included in this practical resource. THE ENGINEERING GUIDE TO LEED NEW CONSTRUCTION COVERS: Introduction to the U.S. Green Building Council's LEED NC rating system, Sustainable sites, Water efficiency, Energy and atmosphere, Materials and resources, Indoor environmental quality, Innovation in design and regional priorities, A systematic view of green and minimum program requirements, Department of Defense sustainable construction and indoor air quality, IAQ, Low impact development.
