Suke European Union:

EU External Relations Law and Policy in the Post-Lisbon Era Paul James Cardwell, 2011-11-17 This is a collection of works which considers the many different facets of the EU's increasingly important engagement with the world beyond its borders. The Treaty of Lisbon marked a change in the powers and competences endowed on the EU; the contributions to this collection consider both the direct and indirect impact of the Treaty on the contemporary state of EU external relations. The authors are drawn from legal, political science and international relations disciplines and consider innovations or changes brought about by the Treaty itself: the European External Action Service, the roles of the High Representative and President, the collapse of the pillar structure and new competences such as those for foreign investment. Other chapters cover developments which reflect the latest incremental changes upon which the post-Lisbon Treaty arrangements have some bearing, including the COREU network, the transatlantic and neighbourhood relations and the external dimension of internal security. Useful for academics working in the field of EU external relations law and foreign policy as well as the EU law politics, European studies market more generally. *European Union Law* Robert Schütze, 2025 **Understanding**

Conflicts of Sovereignty in the EU Nathalie Brack, Ramona Coman, Amandine Crespy, 2021-05-09 This book investigates the multifaceted conflicts of sovereignty in the recent crises in the European Union. Although the notion of sovereignty has been central in the contentious debates triggered by the recent crises in the European Union, it remains strikingly under-researched in political science. This book bridges this gap by providing both theoretical reflections and empirical analyses of today's conflicts of sovereignty in the EU. More particularly, it investigates conflicts between four types of sovereignty: first, national sovereignty referring to the autonomy of the Westphalian Nation State to rule on a territory delimited by borders; second, the supranational sovereignty acquired by the EU in a fragmentary fashion in a number of scattered internal and external policy fields; third, parliamentary sovereignty understood as the autonomy of parliaments at the regional, national and European levels to take part in the decision-making process and control the executive in the name of the principles of election and representation; fourth, popular sovereignty whereby the body politic confers legitimacy to decision-makers in a democratic system. Through an analysis of the various crises (rule of law, Brexit, migration, Eurozone crisis), the chapters look at how sovereignty is framed and contested by different types of actors and how the strengthening or the weakening of certain types of sovereignty contribute to shape preferences regarding policies and governance structures in the multi-level EU. The chapters in this book were originally published as a special issue of the *Journal of European Integration*. **European Constitutional Law** Robert Schütze, 2021 Written in a uniquely engaging style and full of illuminating analyses, this book provides a thorough and modern guide to the study of the constitutional law of the Union. Numerous diagrams and tables clarify key concepts and processes, and a practical appendix helps students to find and read primary and secondary legal sources. **European Studies in Asia** Georg Wiessala, 2014-03-21 As countries across Asia continue to rise and become

more assertive global powers the role that Higher Education has played and continues to play in this process is an issue of growing pertinence Furthermore understanding the relationship between Europe and Asia fostered by historical and contemporary knowledge transfer including Higher Education is crucial to analysing and encouraging the progress of both regional integration and inter regional cooperation With a specific focus on international Higher Education European Studies in Asia investigates knowledge transfer and channels of learning between Europe and Asia from historical contemporary and teaching perspectives The book examines a selection of significant historical precedents of intellectual dialogue between the two regions and in turn explores contemporary cross regional discourses both inside and outside of the official frameworks of the European Union EU and the Asia Europe Meetings ASEM Drawing on extensive case studies based on many of his own teaching experiences Georg Wiessala addresses key questions such as the nature and construction of the European Studies in Asia curriculum aspects of values co constructed learning and adult pedagogy in the discipline of European Studies in Asia the politics of Asian host cultures the internationalization of Asian Higher Education and the experiences and expectations of tertiary sector students of this subject in Asia Australia and New Zealand In doing so the author articulates a range of outcomes for the further development of Higher Education cooperation agendas between Asia and Europe in the discipline of European Studies and in related fields such as International Relations This case study led book makes an original and novel contribution to our understanding of European Studies in Asia As such it will be of great interest to students and scholars of Asian Education Comparative Education European Studies and International Relations

EU Values Before the Court of Justice Luke Dimitrios Spieker, 2023-06-18 The European Union's values enshrined in Article 2 TEU have come under severe pressure in several Member States In response the Court of Justice has set a spectacular development in motion With its ruling in *Associação Sindical dos Juizes Portugueses* it activated the Union's common values and positioned Article 2 TEU at the very heart of its jurisprudence Turning Article 2 TEU into an operational judicially applicable provision the Court has begun to assess the Member States constitutional structures against these yardsticks Since then the jurisprudence has evolved with remarkable speed EU Values Before the Court of Justice provides a first comprehensive study of the judicial mobilisation of Article 2 TEU It starts by developing the foundations of this emerging jurisprudence in empirical doctrinal and theoretical terms In this book Spieker seeks to advance a new understanding of Article 2 He argues that the provision should be understood as having a dual character that resonates between two dimensions namely an EU dimension limited to the EU legal order and a *Verbund* dimension that extends to the common whole of the Union and its Member States Article 2 plays different roles in these two spheres as thick constitutional core of the EU legal order and as thin constitutional frame for the *Verbund* This dual character should guide the provision's future judicial development The book sets out to explore the multifaceted potential of Article 2 TEU in each of these two dimensions As such it goes far beyond the current focus on illiberal developments in Member States and strives to broaden our horizon for the judicial mobilisation of EU values The

book closes by assessing the risks of placing an activated Article 2 into the hands of Luxembourg judges and proposes ways to recalibrate the jurisprudence Crisis and Politicisation Benedetta Voltolini, Michal Natonski, Colin Hay, 2021-05-18 This book elucidates the link between the politics of a now seemingly permanent crisis in Europe and the politicisation of European integration Looking at the epistemic dimension of crises it suggests that the way in which a crisis is framed and contested determines its potential impact on the level of politicisation of European integration Europe is more challenged and contested today than it has even been facing crisis of an almost existential kind Yet political crises are manufactured and narrated so Europe has the possibility to intervene and bring about her recovery instead of letting these crises prove terminal This book explores the political process in and through which certain events come to be framed as constitutive of a moment that requires a decisive intervention It shows that crises require a double framing a situation needs to be identified as one of crisis in the first place and subsequently the nature and character of the crisis need to be specified By examining a wide range of policy areas the book demonstrates that framing of crises i e identifying one situation both as a crisis and a crisis of a particular kind contributes to the politicisation or depoliticisation of the process of European integration The chapters in this book were originally published as special issue of Journal of European Integration Europe as a Stronger Global Actor Simon Duke, 2016-11-10 This book considers the principal challenges facing the European Union which has been buffeted by a series of profound crises both internal and external These range from the future of Ukraine the Union's reactions to China's One Belt One Road initiative how to help stabilize countries to its south and relations with the United States The core argument is that the EU lacks a meta narrative that could indicate priorities and linkages between the various continental regional national and thematic strategies As a result the EU often appears to be a confusing and even contradictory actor to many international partners In response to these challenges the EU needs to develop a deeper sense of strategic awareness and confidence so that it may give a more convincing response to fundamental questions about the Union's role purpose and identity in a changing world **The Library Catalogs of the Hoover Institution on War, Revolution, and Peace, Stanford University** Hoover Institution on War, Revolution, and Peace, 1972 **Journal of European Integration**, 2008 **Central European Political Science Review**, 2004 **Forthcoming Books** Rose Army, 2003 *The Europa World of Learning 2007 Volume 2* Europa Publications, 2006 This volume is a comprehensive directory and guide to the organizations and institutions throughout the sphere of higher education and learning It profiles some 30 000 academic institutions and over 200 000 staff and officials Immigration and Asylum Matthew J. Gibney, Randall Hansen, 2005-06-21 A comprehensive and timely examination of the history and current status of immigrants and refugees their stories the events that led to their movement and the place of these movements in contemporary history and politics Immigration and Asylum From 1900 to the Present is an accessible and up to date introduction to the key concepts terms personalities and real world issues associated with the surge of immigration from the beginning of the 20th

century to the present It focuses on the United States but is also the first encyclopedic work on the subject that reflects a truly global perspective With contributions from the world s foremost authorities on the subject Immigration and Asylum offers nearly 200 entries organized around four themes immigration and asylum the major migrating groups around the world expulsions and other forced population movements and the politics of migration In addition to basic entries the work includes in depth essays on important trends events and current conditions There is no better resource for exploring just how profoundly the voluntary and forced movement of asylum seekers and refugees has transformed the world and what that transformation means to us today Nearly 200 A Z entries on immigration and asylum around the world 150 contributors including leading immigration scholars from around the globe such as Nathan Glazer Saskia Sassen Ari Zolberg James Hollifield Desmond King and Stephen Castles A separate volume of primary source documents including legislation treaties speeches and United Nations documents A chronology of major movements of migrants and asylum seekers
