## **Summated Rating Scale Construction An Introduction:**

**Summated Rating Scale Construction** Paul E. Spector,1992 The goal in surveying is to develop a rating on some attitude value or opinion a summated rating scale To help researchers construct more effective scales Spector shows how to determine the number of items necessary the number of response categories and how to validate a scale [Data Construction and Data Analysis for Survey Research](#) Raymond Kent,2020-05-19 Based on the needs of business marketing and social science students this book provides an accessible and easy to follow guide to survey data analysis The book avoids the more usual statistics driven perspective Rather it provides an intuitive feel for handling survey data by emphasising that data analysis is more about understanding the research objectives what kinds of data have been collected how quantitative data were generated by the process of measurement how to create a data matrix and how to transform raw data before thinking about appropriate statistical calculations The author begins by considering what data are the different kinds of data that surveys generate and the tripartite format of all quantitative data The processes of measurement and the errors that may arise are carefully explained Coverage of the creation and analysis of a data matrix using SPSS is then provided The author then reviews what kinds of statistical procedure are required for what kinds of data and for what purposes The book concludes by giving a review of strategies for coping with all the kinds of practical problems that arise in survey research Reader friendly throughout *Data Analysis A Guide to Market and Social Research* provides numerous worked examples end of chapter questions and points for further discussion to help reinforce concepts learnt A data diskette containing the worked examples in SPSS is also provided in the back of the book Also available is a companion website with extra features to accompany the text please take a look by clicking below <http://www.palgrave.com/business/kent/index.asp> [Handbook of Research Design and Social Measurement](#) Delbert C. Miller,Neil J. Salkind,2002-01-16 If a student researcher had only one handbook on their bookshelf Miller and Salkind s Handbook would certainly have to be it With the updated material the addition of the section on ethical issues which is so well done that I m recommending it to the departmental representative to the university IRB and a new Part 4 on Qualitative Methods the new Handbook is an indispensable resource for researchers Dan Cover Department of Sociology Furman University I have observed that most instructors want to teach methodology their way to imbue the course with their own approach Miller Salkind allows one to do this easily The book is both conceptually strong e g very good coverage of epistemology research design and statistics and at the same time provides a wealth of practical knowledge scales indices professional organizations computer applications etc In addition it covers the waterfront of methodology Michael L Vasu Director of Information Technology North Carolina State University A unique and excellent reference tool for all social science researchers and a good textbook for graduate students and senior year undergraduate classes These students are about to enter the real life of research and need a handy and comprehensive tool as a starting point that offers shortcuts for getting into real research projects For a small project the book offers enough

information to get the project started For big projects the book is ideal for information on where to look for things and examples Jianhong Liu Department of Sociology Rhode Island College The book considered a necessity by many social science researchers and their students has been revised and updated while retaining the features that made it so useful The emphasis in this new edition is on the tools graduate students and more advanced researchers need to conduct high quality research Features Benefits Provides step by step instruction for students research training by beginning with how to find a creative idea a middle range theory and initial hypothesis and proceeds through design proposal collection and analysis of data followed by writing reporting and publication Section on scales and indices are organized so that readers can quickly locate and find the type of scale or index in which they may be interested All sections are now followed by useful and well considered reference sections so that readers can read more about each topic Includes updated coverage on new scales internal and external validity and new analytic techniques with extensive references on each Presents extensive coverage of how to prepare manuscripts for publication including a list of all journals covered by Sociological Abstracts along with the editorial office address and URL for each entry Discusses the importance of policy research with presentation and discussion of specific models as an adjunct to both applied and basic research techniques Provides extensive coverage of funding opportunities including those offered by the National Institutes of Health the National Science Foundation and a directory of private funding sources including relevant contact information New to this edition New Part 4 by John Creswell and Ray Maietta provides a comprehensive introduction to qualitative methods including a review of existing computer applications for collecting and analyzing data New and more current reviews and commentaries have replaced dated or no longer relevant excerpts Thousands of new references on the assessment of important sociological variables as well as references to such topics as statistical analysis computer applications and specific topics Thoroughly updated information on the use of computers and online research techniques including beginning and intermediate material about the Internet and its use by the modern research scientist Coherent and thoughtful review of the most popular statistical analysis software packages New guidelines and discussion of ethical practices in social and behavioral science research including extensive coverage of institutional review board procedures and activities Expansion of social indicators to include international coverage Plus there is an extensive and well organized table of contents with four levels of headings and for the first time in the history of the book a comprehensive index

**Doing Business Research** Nick Lee, Ian Lings, 2008-03-26 It s not often that you ll find an article or book that explains what you need to know in such plain simple terms Treasure it Andrew Farrell Doctoral Researcher Loughborough University Entertaining and authoritative without being patronising Professor Chris Hackley Royal Holloway University of London This is a gem of a book from two of the outstanding management researchers of their generation Easy to read and entertaining yet rigorous and comprehensive in its approach this book will be adopted as an essential aid for students undertaking final year projects masters dissertations and as a primer for doctoral researchers

Professor Graham Hooley Aston University This book will fill a vital gap for post graduate research Professor Rod Brodie University of Auckland Business School For anyone involved in developing a research project this textbook provides an integrated accessible and humorous account that explains why research methods are the way they are and how they do what they do Unrivalled in its nature Doing Business Research addresses the research project as a whole and provides essential detail of philosophical and theoretical matters that are crucial to conceptualising the nature of methodology a pragmatic guide to why things are important and how they are important a huge range of things to consider that the reader can use to develop their research project further a resource book providing extensive suggested reading to help the researcher do their research

*Basic Measurement* Michael S. Lewis-Beck,1994

**Propensity Score Methods and Applications** Haiyan Bai,M. H. Clark,2018-11-20 A concise introductory text Propensity Score Methods and Applications describes propensity score methods PSM and how they are used to balance the distributions of observed covariates between treatment conditions as a means to reduce selection bias This new QASS title specifically focuses on the procedures of implementing PSM for research in social sciences instead of merely demonstrating the effectiveness of the method Using succinct and approachable language to introduce the basic concepts of PSM authors Haiyan Bai and M H Clark present basic concepts assumptions procedures available software packages and step by step examples for implementing PSM using real world data with exercises at the end of each chapter allowing readers to replicate examples on their own

Blasi, 2008 Group incentive systems have to overcome the free rider or 1 N problem which gives workers an incentive to shirk if they are to succeed This paper uses new questions on responses to shirking from the General Social Survey and a special NBER survey of workers at over 300 worksites in 14 companies that have some form of group incentive pay to examine how well workers can monitor their peers and what they do when the peers are not working up to speed The paper finds that 1 most workers say that they can detect fellow employees who shirk 2 many report that they would speak to the shirker or report the behavior or a supervisor and many report that they did so in the past 3 the proportion that takes action against shirkers is greatest among workers paid under group incentive systems in smaller companies and in companies with good employee management relations 4 group incentives interact with high performance human resource policies such as employee involvement teams training task variety low levels of supervision and good fixed wages to induce more workers to act against shirking 5 workers in workplaces where there is more anti shirking behavior report that co workers work harder encourage other workers more and report that their workplace facility is more effective in ways that should raise productivity and profits *Parents' Perceptions of Child Personality* Maria Slotboom, Eric Elphick, 1997 **Do Workers Gain by Sharing?** Douglas Kruse, Richard Freeman, Joseph R. Blasi, 2008 This paper examines how shared capitalism compensation systems those that link employee pay to company performance affect diverse employee outcomes It uses two data sets the national GSS survey that provides a broad representative view of the extent of the programs and the NBER Shared Capitalism Project surveys of workers in 14 companies that use shared capitalism programs extensively We find that greater involvement in the programs is generally linked to greater participation in decisions higher quality supervision and treatment of employees more training higher pay and benefits greater job security and higher job satisfaction We also find positive interactions of shared capitalism with high performance policies in predicting participation in decisions and overall job satisfaction and negative interactions of shared capitalism with close supervision in affecting almost all of the outcomes Overall the results support the idea that workers can gain by sharing but whether this happens is contingent on other workplace policies Customer Relationship Management Jon Anton, 1996 Appropriate as a stand alone text for single semester courses in Customer Relationship Measurement Service Marketing Customer Service or Consumer Affairs This book documents and demonstrates cost effective techniques that the authors themselves have used to assist company managers in accomplishing strategic customer relationships management It provides future or practicing non technical corporate managers with the tools to better retain customers by backing their hard decisions with the soft numbers used to measure customer relationships Perceptions of Support and Future
