Surgeons Apprentice:

The Surgeon's Apprentice John Case, 2019-10-24 Second in a multivolume memoir The Surgeon's Apprentice follows a young John Case through his medical and then surgical training in an era when penicillin was a new wonder drug John's experience training at two universities and eight hospitals during his apprenticeship documents a time when the scalpel was the main surgical instrument endoscopes were primitive there were no CAT scans or MRIs and haematology investigations and laboratory tests were restricted Despite the lack of technology or perhaps because of it there was a more personal side to medicine as every patient had a personal GP who knew them The GPs ran twice daily surgeries and even visited in their own homes those unable to attend the surgery Tragic and poignant in places uproaringly funny in others this memoir provides a glimpse of a way of teaching and living that is now lost to us John's wonderfully engaging voice brings his adventures and misadventures alive in the pages of A Surgeon's Apprentice and will have readers cringing along with him as he settles into the Coffin at night and struggling beside him as he questions the rationality morality and even legality of the choices he must make in treating his patients

The Surgeon's Apprentice Sara Fraser, 2001 In the first part of the nineteenth century James Kerr an ambitious young man with a burning vocation to become a doctor joins his uncle's practice in the North of England In a time that medicine was still a primitive brutal business James finds his cherished ideals about the role of the doctor and the dignity of the medical establishment shown up as hollow illusions

Surgery, Skin and Syphilis Philip K. Wilson, 1999 Enlightenment London surgeon Examining his personal professional and genteel achievements enhances our understanding of the boundary between surgeons and physicians in Enlightenment marketplace practice Turner's pioneering writing on skin disease De Morbis Cutaneis emphasizes the skin's role as a physical and professional boundary between university educated physicians who treated internal disease and apprentice trained surgeons relegated to the care of external disorders Turner also argued that a pregnant woman's imagination could be transferred to her unborn child imprinting its skin with various marks and deformities This stance sparked a major pamphlet war between Turner and London physician James Blondel raising this phenomenon from a folk belief to a chief concern of Enlightenment natural philosophy Turner's career long crusade against quackery and his voluminous writings on syphilis a common surgical disorder provide a refined view into distinctions between orthodox and quack practices in 18th Century London Turner long viewed as a pioneer in British dermatology also holds the Anglo American distinction of receiving a medical degree from Yale the first such degree offered from Colonial America

The Surgeon's Apprentice Arthur Young,1999 1947 Young Neil Aitken has worked hard to secure a place at Glasgow University to study medicine Bearing in mind the Dean s warning that it takes more than book learning to become a doctor he sets out to discover what that other quality might be **The Education of a Surgeon Under Thomas Vicary ...** Sir D'Arcy Power,1921 *The Surgeon's Apprentice* John Biggins,2010 A tale of medicine war seafaring and stargazing from the very beginnings of the modern world Cover **History of the Royal College of Surgeons in Ireland, and of the Irish Schools of Medicine** Charles Alexander Cameron,1886 *The Military Surgeon* ,1911 *The Charitable Imperative* Colin Jones,2024-12-06 Drawing on a wide variety of archival and secondary sources *The Charitable Imperative* originally published in 1989 provides an overview of the very different institutions that treated the poor in France from the seventeenth through to the early nineteenth centuries hospitals and poorhouses military infirmaries reformatories for prostitutes holding places for the insane and so on It recovers much of the daily realities of the institutions for those who lived in or passed through them and highlights the very limited progress made in most of them by the medical profession The principle of charity which underpinned this system of relief placed moral and social obligations on all who dealt with the poor a kind of charitable imperative affected the thinking and behaviour of the administrators who managed the institutions the nursing sisters who gave their lives and the donors who gave up their possessions to meet the needs of the poor However the poor were also expected to pay their part with the result that the Ancien R gime charity subsumed compulsion and repression as well as compassion In spite of efforts to introduce a state sponsored welfare system during the French Revolution the charitable imperative was a legacy of the Ancien R gime to much of the nineteenth century The breadth of institutions covered and the length of the historical period under review will ensure the appeal of this book to a wide variety of historians In particular the chapters on nursing sisters will be of great interest to social historians as well as those working in the history of medicine *The Annals of the Barber-surgeons of London* Sidney Young,1890 **Surgery** Jeffrey Norton,R.Randall Bollinger,Alfred E. Chang,Stephen F. Lowry,2012-12-06 had a dream My dream was to assemble the current and future leaders in surgery and ask them to develop an evidence based surgical textbook that would provide the reader with the most up to date and relevant information on which to base decisions in modern surgical practice In other words the dream was to create the best most comprehensive textbook of surgery Fortunately I met Laura Gillan of Springer

Verlag New York who had a similar dream As our editor she has provided the foundation and structure for this dream She has made this dream a reality Because surgery is a highly specialized and diverse discipline with significant complexity I also needed a commitment from outstanding surgeons to serve as coeditors I was fortunate to have a diverse group of exceptional young energetic cutting edge surgical investigators share in this project and I wish to thank them for their valuable contribution to this undertaking The Editorial Board including Randy Bollinger Fred Chang Steve Lowry Sean Mulvihill Harvey Pass and Robert Thompson met for the first time at the American College of Surgeons meeting in Chicago in October 1997 Fig 1 There this book was conceived Each of us developed the plan and content for his specific surgical discipline The common thread is that all decisions and recommendations are based on the best available evidence and that the reader can clearly see the evidence in our Evidence based tables specifically marked for the reader's reference
