Translation and Localisation in Video Games Miguel Á. Bernal-Merino,2014-09-19 This book is a multidisciplinary study of the translation and localisation of video games It offers a descriptive analysis of the industry understood as a global phenomenon in entertainment and aims to explain the norms governing present industry practices as well as game localisation processes Additionally it discusses particular translation issues that are unique to the multichannel nature of video games in which verbal and nonverbal signs must be cohesively combined with interactivity to achieve maximum playability and immerse players in the game s virtual world Although positioned within the theoretical framework of descriptive translation studies Bernal Merino incorporates research from audiovisual translation software localisation computer assisted translation comparative literature and video game production Moving beyond this framework Translation and Localisation in Video Games challenges some of the basic tenets of translation studies and proposes changes to established and unsatisfactory processes in the video game and language services industries

Homebrew Gaming and the Beginnings of Vernacular Digitality Melanie Swalwell,2021-08-17 The overlooked history of an early appropriation of digital technology the creation of games though coding and hardware hacking by microcomputer users From the late 1970s through the mid 1980s low end microcomputers offered many users their first taste of computing A major use of these inexpensive 8 bit machines including the TRS System 80s and the Sinclair Atari Microbee and Commodore ranges was the development of homebrew games Users with often self taught programming skills devised the graphics sound and coding for their self created games In this book Melanie Swalwell offers a history of this era of homebrew game development arguing that it constitutes a significant instance of the early appropriation of digital computing technology Drawing on interviews and extensive archival research on homebrew creators in 1980s Australia and New Zealand Swalwell explores the creation of games on microcomputers as a particular mode of everyday engagement with new technology She discusses the public discourses surrounding microcomputers and programming by home coders user practices the development of game creators ideas with the game Donut Dilemma as a case study the widely practiced art of hardware hacking and the influence of 8 bit aesthetics and gameplay on the contemporary game industry With Homebrew Gaming and the Beginnings of Vernacular Digitality Swalwell reclaims a lost chapter in video game history connecting it to the rich cultural and media theory around everyday life and to critical perspectives on user generated content
