## Surface Streets:

*Better Roads and Streets*, 1919      Cost Accounting for Streets and Highways National Committee on Urban Transportation (U.S.), 1959      Traffic Control Thomas R. Horton, 2012-12-06 At the close of the year 1900 motor vehicle registrations throughout the United States totaled 8000 These vehicles rode on unpaved and often dusty country roads The only problem of traffic was an occasional pedestrian or a frightened horse or cow frenzied by the roar of this new creature Today more than 82 000 000 registrations representing 50% of the world s automobiles are recorded in this country In 1963 these vehicles traveled 798 billion miles over newly constructed modern highways expressways freeways quickways and thru ways as well as improved rural and urban roads and streets Out of all this has sprung the traffic engineer Today s modern roadway is an engineering structure which has been developed through sound principles of design with provisions for safety and efficiency An example of this safety factor can be found by the exacting specifications for cross sections grades roadside control medians and other design features For many years the responsibility for controlling traffic fell naturally into the domain of the police However as traffic increased many problems developed which were beyond the scope of normal police work Since the highway system is an engineering structure which requires an engineering approach to appraise operating problems and engineering techniques to solve them the traffic engineer came into being      **Hearings Before the Subcommittee on Public Buildings and Grounds of the Committee on Public Works, House of Representatives ...** United States.
