**Training Regulations** United States. War Department, **Latin American Macroeconomic Reforms** José Antonio González, Vittorio Corbo, Anne O. Krueger, Aaron Tornell, 2010-04-15 Hidden behind a number of economic crises in the mid to late 1990s including Argentina's headline grabbing monetary and political upheaval is the fact that Latin American economies have generally speaking improved dramatically in recent years. Their success has been due in large part to macroeconomic reforms and this book brings together prominent economists and policymakers to assess a decade of such policy shifts highlighting both the many success stories and the areas in which further work is needed. Contributors offer both case studies of individual countries and regional overviews covering monetary, financial and fiscal policy. Contributors also work to identify future concerns and erect clear signposts for future reforms. For instance, now that inflation rates have been stabilized, one suggested second stage monetary reform would be to focus on reducing rates from high to low single digits. Financial sector reforms, it is suggested, should center on improving regulation and supervision. And contributors argue since fiscal stability has already been achieved in most countries, new fiscal reforms need to concentrate on institutionalizing fiscal discipline, improving the efficiency and equity of tax collection and modifying institutional arrangements to deal with increasingly decentralized federal systems. The analysis and commentary in this volume, authored not only by academic observers but by key Latin American policymakers with decades of firsthand experience, will prove important to anyone with an interest in the future of Latin America's continuing economic development and reform. Contributors to this volume: José Antonio González, Stanford University; Anne O. Krueger, International Monetary Fund; Vittorio Corbo, Pontifical Catholic University, Chile; Klaus Schmidt Hebbel, Central Bank of Chile; Alejandro Werner, Bank of Mexico; Mauricio P. García, Pontifical Catholic University, Rio de Janeiro; Tatiana Didier, World Bank; Gustavo H. B. Franco, former president, Central Bank of Brazil; Francisco Gil Díaz, Minister of the Treasury, Mexico; Roberto Zahler, former governor, Central Bank of Chile; Ricardo J. Caballero, Massachusetts Institute of Technology; Philip L. Brock, University of Washington; Stephen Haber, Stanford University; Pablo E. Guidotti, Universidad Torcuato Di Tella, Buenos Aires; Vito Tanzi, International Monetary Fund; Enrique D. Vila, Ministry of Finance, Mexico; Santiago Levy, Mexican Social Security Institute; Ricardo Fenochietto, private consultant, Buenos Aires; Rogério L. F. **Regional analysis of the nationally determined contributions in Latin America** Food and Agriculture Organization of the United Nations, 2020-04-01 This report provides a unique sector-specific synthesis of the Nationally Determined Contributions (NDCs) from Latin America. It summarizes the substantial contributions already put forward by countries, opportunities for further action, and the gaps, barriers, and needs that will need to be addressed if the

agriculture and land use sectors in Latin America are to raise mitigation and adaptation ambitions The findings of this report will help member countries to reflect on their progress in advancing toward NDC priorities for agriculture and associated national climate goals including related targets under the SDGs The analysis also helps to clarify the links between the NDCs from the region and the Sendai Framework for Disaster Risk Reduction SFDRR Finally the report serves as a guide to FAO as well as other international actors for the support that will be required to help countries in the region to move forward to implement agriculture and land use sector priorities in their NDCs and ensure that future commitments from the agriculture sector are quantifiable verifiable and sufficiently ambitious
