## **Task Listening:**

*Task Listening Student's Book* Lesley Blundell, Jackie Stokes, 1981-03-12 Task Listening aims to develop the listening skills of students who have had little exposure to authentic spoken English. It is suitable for lower intermediate and also more advanced students whose listening has been developed primarily as a means to a grammatical or structural end. Each of the twenty-six units consists of a short tape recording and related tasks. The recordings are of people speaking at normal speed in everyday situations. Each unit has as its theme a setting or situation in which listening plays a major part, for example at an airport listening for flight announcements or at a travel agency being told about different means of transport. In each case, having completed the necessary language work, students listen to the tape and extract the information necessary to complete a simple task such as labelling a picture or filling in a grid. Related reading and writing tasks are provided as a follow-up to each listening task. Task Listening aims to help students to sift out utterances of relevance and ignore redundant features, a skill vital to efficient listening at all levels of language learning.

appreciative listening appears in Chapter 3 to help students respond to today's stressful environment and the need for approaches to relaxation. Because the rapid increase in technology has changed the way we listen, more coverage on listening and technology has been added throughout the text. The new edition has been thoroughly updated with current research and new examples to provide the most recent information available. Praise for Listening Attitudes, Principles and Skills. This text includes fabulous activities and application exercises, case studies, and concise chapters. I have already adopted this book, and in the face of other listening texts reviewed, will remain with this text. Lisa Abramson, Western Oregon University. The HURIER model and organizing the book around it are major strengths of this book, which are especially important when teachers are increasingly required to measure course outcomes as part of program assessment. Thomas Marshall, Robert Morris University.
