Taste Of Cockroach:

On Fiction and Being a Good Animal David P. Rando,2024-10-31 Instead of making readers into better people what if fiction could help us to become better animals On Fiction and Being a Good Animal argues that we should abandon the persistent humanist idea that fiction can produce better people Instead we should read and value fiction according to its ability to help us to envision being better animals Inspired by Theodor W Adorno David Rando defines a good animal as one who does not live a life of domination He argues that when readers approach fiction s wishful images with non anthropocentric expectations we are rewarded by anthropocosmic visions of the world ones in which humans are in and with the world but no longer at the centre of it In compelling readings of Agustina Bazterrica T C Boyle Leonora Carrington Marian Engel Karen Joy Fowler Franz Kafka Doris Lessing Clarice Lispector Kenzaburo Oe Olga Tokarczuk and Jesmyn Ward the book explores wishful images that pertain to the nonhuman and more than human worlds Readers will discover in this fiction wishful images relating to irreconcilable minds and experiences human nonhuman family relationships love and risk across race and species and shared vulnerability communion and pleasure **Figuring Animals** M. Pollock,C. Rainwater,2016-10-03 This is a collection of fifteen essays which expose weaknesses in western epistemological frames of reference that for centuries have limited our views and thus our experiences of animal being including our own The volume contributes to current discussions of new ways of seeing the other inhabitants of this world and more effective ways of sharing the world with them The contributors draw on and complement the growing field of ecocriticism but because the contributors draw on an array of disciplinary and cultural perspectives it will appeal to a wide audience ranging from literary scholars philosophers art historians anthropologists and cultural historians including graduate and undergraduate students in all these disciplines to laypersons interested in nature writing and environmental issues Cockroaches Lynn M. Stone,1995 Describes what cockroaches look like what they eat where and how they live who their relatives are and how their antennas serve as senses **Comprehensive Molecular Insect Science** ,2025-11-01 Comprehensive Molecular Insect Science Second Edition is a unique resource that provides extensive review articles on contemporary topics in insect science and entomology It covers crucial new subjects such as genetic control pollinators and the effects of climate change and environmental shifts on insect physiology and molecular biology Every section includes thorough discussions on the influence of genomics proteomics metabolomics and bioinformatics in the field which has seen significant advancements since the previous edition The book bridges gaps between disciplines helping readers grasp the fundamentals of insect science and appreciate its applications such as in environmental control Structured chapters guide readers offering references and practical resources like methods This authoritative reference is vital for understanding and managing the future of our civilization intertwined with the fate of insects and flora on our planet Covers all contemporary topics stressing the importance of insect science in the context of climate change ecological sustainability and the challenges confronting
