To The Red Planet

Jonathan Webb

To The Red Planet:

The Case for Mars Robert Zubrin, Richard Wagner, 2011-06-28 He explains step by step how we can use present day technology to send humans to Mars within ten years actually produce fuel and oxygen on the planet's surface with Martian natural resources how we can build bases and settlements and how we can one day terraform Mars a process that can alter the atmosphere of planets and pave the way for sustainable life Under Dr Zubrin's program a human mission is only the first step toward a day when research bases and eventual colonies can be developed on Mars surface Mars possesses enormous chemical and mineral resources all of which can be put to use in pursuit of travel exploration structures and a variety of human activities on a planet that is neither as harsh nor as unreachable as we popularly believe The Case For Mars is not a vision for the far future or one that will cost us impossible billions It is a plan that can be put into action today if we are willing to rethink our traditional methods and costs *Living on Mars* Michael D. Cole, 1999 Describes the landing of Sojourner on Mars summarizes the history of information gathering missions and speculates about future plans for explorations of the Red Planet *To the Red Planet* Eric Burgess, 1978 An account of the 1976 Viking expedition to Mars describes the spacecraft and its instruments the journey itself and the mission's results Mars Leonard David, 2016 The next frontier in space exploration is Mars the red planet and human habitation of Mars isn't much farther off Now the National Geographic Channel goes years fast forward with Mars a six part series documenting and dramatizing the next 25 years as humans land on and learn to live on Mars This companion book to the series explores the science behind the mission and the challenges awaiting those brave individuals Filled with vivid photographs taken on Earth in space and on Mars arresting maps and commentary from the world's top planetary scientists this fascinating book will take you millions of miles away and decades into the future to our next home in the solar system Mars DK, 2020-03-18 Has there ever been life on Mars Will we be living there soon HOW Discover the past present and future of the mysterious red planet in this beautiful non-fiction book for kids The launch of Mars rovers by NASA Europe and China in 2020 will be the biggest science news of the year and will reveal more about Mars than ever before Get ahead with this amazing new book which explores the evidence for past life on Mars what's happening there now and what it might look like to one day live on the red planet Discover incredible space technology learn how to spot the planet in the night sky throughout the year and find out if YOU VE got what it takes to join the teams traveling to Mars in the coming years Children will adore this essential guide to the red planet Incredible images and fun illustrations will ignite their imagination and give them a fascinating insight into what the future might hold Destination Mars Rod Pyle, 2012-04-24 In the next decade NASA by itself and in collaboration with the European Space Agency is planning a minimum of four separate missions to Mars Clearly exciting times are ahead for Mars exploration This is an insider's look into the amazing projects now being developed here and abroad to visit the legendary red planet Drawing on his contacts at NASA and the Jet Propulsion Laboratory the author provides stunning insights into the

history of Mars exploration and the difficulties and dangers of traveling there After an entertaining survey of the human fascination with Mars over the centuries the author offers an introduction to the geography geology and water processes of the planet He then briefly describes the many successful missions by NASA and others to that distant world But failure and frustration also get their due As the author makes clear going to Mars is not and never will be easy Later in the book he describes in detail what each upcoming mission will involve In the second half of the book he offers the reader a glimpse inside the world of Earth based Mars analogs places on Earth where scientists are conducting research in hostile environments that are eerily Martian Finally he constructs a probable scenario of a crewed expedition to Mars so that readers can see how earlier robotic missions and human Earth simulations will fit together All this is punctuated by numerous firsthand interviews with some of the finest Mars explorers of our day including Stephen Squyres Mars Exploration Rover Bruce Murray former director of the Jet Propulsion Laboratory and Peter Smith chief of the Mars Phoenix Lander and the upcoming OSIRIS REx missions These stellar individuals give us an insider's view of the difficulties and rewards of roaming the red planet The author's infectious enthusiasm and firsthand knowledge of the international space industry combine to make a uniquely appealing and accessible book about Mars

Mars William Sheehan, 2010-12-08 No other planet has so fired the human imagination as Mars The possibility of life on the planet was an obsession in the 19th century It is not surprising to find that it has become so once again because of all the planets in the solar system apart from Earth Mars has always been regarded as the most likely to serve as the abode of life Now that there are hints that the planet may have held liquid water a prerequisite for life in contrast to the frozen water of the ice caps much more recently than anyone had supposed excitement over Mars exploration has never been higher In this engaging eloquent account of our love affair with the Red Planet William Sheehan and Stephen James O Meara review the history of human fascination with our neighbor in the solar system and look at the prospects for manned spaceflight to Mars in this new century The authors portray the history of Mars investigations through the eyes of the dreamers and achievers that have made the planet such an integral part of the human psyche They reveal the discoverers hardships their strength in the face of criticisms and the glories of their successes What Everest and the moon were to the 20th century Mars will be to the 21st Mars is our Everest a new frontier that will continue to spur the greatest flights of imagination and the most astounding technical feats Projects are already underway to make these dreams a reality This book will prepare you and fill you with enthusiasm for the adventure ahead
