**Human-Centred Design of Socially Interactive Virtual Agents** Emma Mainza Chilufya, 2025-02-24

The thesis is within the field of cognitive science set within the domains of situated cognition and mediated action with a focus on mediation in Human Computer Interaction HCI It discusses cognition in relation to users Intelligent Virtual Agents IVAs and the interaction environment The perspectives and actions of users humans significantly influence the course of the interaction IVAs as mediators facilitate interactions between users and their environments As agents they actively engage with users influencing their decisions and behaviours User involvement in the design process is important for the design of interactive systems When properly implemented using the correct methods principles and techniques can lead to the development of systems that are effective efficient and satisfying to use IVA research has shown a lack of user participation methodologies in the design process The design of IVAs often focuses on individual elements and not the IVA as an integrated whole As a result these design insights do not easily convert into actionable guidelines User involvement is primarily seen during the evaluation phase This leads to the purpose of looking at the design of interactive interfaces of embodied agents virtual and physical set in social interactive spaces by involving the users in the conceptual generation and prototyping phase The research questions are How can we design interactive virtual agents for social interactive spaces and How can we apply human centred design methods to develop interactive virtual agents for social interactive spaces Two case studies a virtual receptionist for a university department and a reading robot BookBot for fourth grade pupils are conducted Each case study involved a concept generation and prototyping phase with the users using human centred design HCD methods and tools Prototypes were developed based on the conceptual phase findings and evaluated with the users One key contribution is the application of HCD methodologies in the design of IVAs within social interactive spaces This includes considerations of the context of interaction mediation patterns and the spaces of interaction Another contribution is the introduction of novel design approaches solution features and competencies that designers should have when designing IVAs in social interactive spaces The thesis presents exemplars of IVAs in these spaces

Avhandlingen ligger inom omr det kognitiv vetenskap med fokus p situerad kognition och medierad handling inom Human Computer Interaction HCI Den diskuterar kognition i relation till anv ndare intelligenta virtuella agenter IVAs och interaktionsmilj n Anv ndarnas m nniskors perspektiv och handlingar p verkar i h g grad interaktionens f rlopp IVAs som medlare underl ttar interaktioner mellan anv ndare och deras milj er Som agenter engagerar de sig aktivt med anv ndare och p verkar deras beslut och beteenden Anv ndarinvolvering i designprocessen r viktig for utformningen av interaktiva system N r den genomf rs korrekt med r tt metoder principer och tekniker kan den leda till utveckling av system som r effektiva ndam

Isenliga och tillfredsställande att använda Forskning om IVAs har visat en brist på användarmetoder i designprocessen Designen av IVAs fokuserar ofta på individuella element och inte på IVA som en integrerad helhet Som ett resultat är dessa designinsikter svåra att omvandla till handlingsbara riktlinjer Användardeltagande ses främst under utvärderingsfasen Detta leder till syftet att undersöka designen av interaktiva gränssnitt för förkroppsligade agenter virtuella och fysiska i sociala interaktiva utrymmen genom att involvera användarna i den konceptuella genereringen och prototypfasen Forskningsfrågorna är Hur kan vi designa interaktiva virtuella agenter för sociala interaktiva utrymmen och Hur kan vi tillämpa användarcentrerade designmetoder för att utveckla interaktiva virtuella agenter för sociala interaktiva utrymmen Två fallstudier en virtuell receptionist för en universitetsavdelning och en lärobok BookBot för fjärrklassare utfördes Varje fallstudie involverade en konceptgenererings och prototypfas med användarna med hjälp av användarcentrerade designmetoder och verktyg Prototyper utvecklades baserat på resultaten från den konceptuella fasen och utvärderades med användarna Ett viktigt bidrag är tillämpningen av användarcentrerade designmetoder i designen av IVAs inom sociala interaktiva utrymmen Detta inkluderar värdgändan av interaktionskontexten medlemsmönster och interaktionsutrymmen Ett annat bidrag är introduktionen av nya designmetoder, läsningsfunktioner och kompetenser som designers bör ha när de designar IVAs i sociala interaktiva utrymmen

people with cognitive emotional or behavioral change Games take various formats from board games to informatics to games with interactive rules of play Similarly computer tools may vary widely in format from self help or assisted computerized training to virtual reality or applications for smartphones Some tools that may be helpful for mental health were specifically designed for that goal whereas others were not Gamification of computer related products and games with a numeric format tend to reduce the gap between games and computers tools and increase the conceptual synergy in such fields Games and computer design share an opportunity for creativity and innovation to help create specifically design and assess preventive or therapeutic tools Computers and games share a design conception that allows innovative approaches to overcome barriers of the real world by creating their own rules Yet despite the potential interest in such tools to improve treatment of mental disorders and to help prevent them the field remains understudied and information is under disseminated in clinical practice Some studies have shown however that there is potential interest and acceptability of tools that support various vehicles rationales objectives and formats These tools include traditional games e g chess games popular electronic games board games computer based interventions specifically designed for psychotherapy or cognitive training virtual reality apps for smartphones and so forth Computers and games may offer a true opportunity to develop assess and disseminate new prevention and treatment tools for mental health and well being Currently there is a strong need for state of the art information to answer questions such as the following Why develop such tools for mental health and well being What are the potential additions to traditional treatments What are the best strategies or formats to improve the possible impact of these tools Are such tools useful as a first treatment step What is the potential of a hybrid model of care that combines traditional approaches with games and or computers as tools What games and applications have already been designed and studied What is the evidence from previous studies How can such tools be successfully designed for mental health and well being What is rewarding or attractive for patients in using such treatments What are the worldwide developments in the field Are some protocols under development What are the barriers and challenges related to such developments How can these tools be assessed and how can the way that they work and for whom be measured Are the potential benefits of such products specific or can these additions be attributed to nonspecific factors What are the users views on such tools What are the possible links between such tools and social networks Is there a gap between evidence based results and market development Are there any quality challenges What future developments and studies are needed in the field

**heat exchanger design using htri pdf pdf scribd - Jul 06 2022**

equipment process design 1 now run and the dp in hot shell side becomes 1 62 bar and overdesign factor becomes 22 2 now increase the shell id and overdesign factor becomes 35 and dp reduces to 0 89 bar 3 now increase baffle spacing to 250 mm and run it again dp reduces to 0 215 and overdesign

**optimization of air cooled heat exchanger design using htri - Apr 03 2022**

for heat exchanger design is htri in software we have option of rating design simulation 5 in commercial software design user defined values of independent design parameters fixed parameters process specification and user updated values of independent design parameter sent to design routine from that it is sent to trial solution

**design manual htri - Aug 19 2023**

the design manual is the comprehensive reference for htri s thermal design recommendations for all types of heat exchangers it summarizes calculation methods in htri software provides design recommendations and offers practical design tips topics covered include basic methods for single phase pressure drop and heat transfer condensation

**make better heat exchanger design decisions with exchanger htri - Jul 18 2023**

exchanger optimizer helps engineers solve different types of design problems enabling specification of more accurate design details exchanger optimizer 3 0 features more robust analysis of complicated geometries for example fixed tubesheet heat exchangers are often designed with expansion joints to handle the differential thermal growth

*getting started building your first case in xphe webinar htri net - Sep 08 2022*

join this xphe webinar on january 24 2024 for an overview of the program s user interface and basic functionality then demonstrates the specification of an exchanger design in xphe using the information in an api 662 spec sheet join this session for a step by step specification of a new xphe case including process conditions physical properties and unit geometry

**pdf design validation of shell and tube heat exchanger by htri** - May 16 2023

jan 1 2012 in design calculation htri software is used to verify manually calculated results in this paper attempt is made to overcome some major theoretical assumptions and serve practical approach as

**optimization of air cooled heat exchanger design using htri** - Aug 07 2022

optimization of air cooled heat exchanger design using htri research and scientific innovation society rsis international in this paper an optimization process is carried out by varying tube pitch transverse pitch number of tube rows and air velocity using heat transfer research incorporation htri software

**tag heat exchanger design htri** - Apr 15 2023

aug 17 2022 fixed tubesheet heat exchangers are often designed with expansion joints to handle the differential thermal growth between the tubes and the shell learn how to use exchanger optimizer 6 1 8 to specify operating metal temperatures and evaluate the cost impact of adding a flanged and flued or bellows expansion joint modify designs read more

*software htri* - Feb 13 2023

xchanger suite is software for the rating simulation and or design of a wide variety of heat transfer equipment including shell and tube and non tubular exchangers air coolers and economizers and fired heaters xchanger suite modules include x fh ultra

**mech 03 design of shell tube heat exchanger using htri** - Jun 05 2022

shell and tube heat exchanger is a class of heat exchanger designs it is the most common type of heat exchanger in oil refineries and other large chemical processes and it is suite for high pressure applications as its name implies this type of heat exchanger consists of a shell a large pressure vessel with a bundle of tubes inside the shell

**overview of xchanger suite htri** - Dec 11 2022

what is xchanger suite xchanger suite considered to be the most advanced thermal process design and simulation software rates simulates and or designs a variety of heat transfer equipment htri s calculation methods are backed by over half a century of applied research and data collected on industrially relevant heat transfer equipment
