Framework Organic Farming

Bernhard Freyer, Jim Bingen

Framework Organic Farming:

Re-Thinking Organic Food and Farming in a Changing World Bernhard Freyer, Jim Bingen, 2014-10-17 This book is based on the assumption that organic has lost its way Paradoxically it comes at a time when we witness the continuing of growth in organic food production and markets around the world Yet the book claims that organic has lost sight of its first or fundamental philosophical principles and ontological assumptions The collection offers empirically grounded discussions that address the principles and fundamental assumptions of organic farming and marketing practices The book draws attention to the core principles of organic and offers different clearly articulated and well defined conceptual frameworks that offer new insights into organic practices Divided into five parts the book presents new perspectives on enduring issues examines standards and certification gives insights into much discussed and additional market and consumer issues and reviews the interplay of organic and conventional farming The book concludes with a framework for rethinking ethics in the organic movement and reflections on the positioning of organic ethics

Sustainable Practices: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2013-12-31 This reference explores some of the most recent developments in sustainability delving into topics beyond environmental science to cover issues of sustainable economic political and social development Provided by publisher *Development Centre Studies Towards Greener and More Inclusive Societies in Southeast Asia* OECD, 2024-03-11 Understanding the effects of both climate change and green growth policies on jobs and people is thus essential for making the transition in Southeast Asia an inclusive one The study explores these issues with emphasis on the potential effects on labour of an energy transition in Indonesia and of a transition in the region s agricultural sector illustrated by a simulated conversion from conventional to organic rice farming

EU Food Law Caoimhín MacMaoláin, 2007-03-01 This is the first comprehensive and detailed analysis of the European Union law of food regulation

Measuring Progress Towards a More Sustainable Europe Eurostat, 2007 The EU sustainable development strategy launched by the European Council in Gothenburg in 2001 and renewed in June 2006 aims for the continuous improvement of quality of life for current and future generations The Eurostat monitoring report to be published every two years underpins the European Commission s progress report on the implementation of the strategy It provides an objective statistical picture of progress based on the EU set of sustainable development indicators

Quantitative rules applied consistently across indicators and visualised through weather symbols provide a relative assessment of whether Europe is moving in the right direction and with sufficient haste given the objectives and targets defined in the strategy. The data presented cover the period from 1990 to 2006 or the latest year available. The statistics covered illustrate the range of issues relevant for sustainable development and should contribute to raising awareness of the opportunities and challenges lying ahead. The European Environment European Environment Agency, 2005. This is the third state and outlook report on the European environment produced by the European Environment Agency (EEA) since 1994. The last report published in 1999 concluded that despite 25 years of Community environmental policy, environmental quality in the European Union (EU) was mixed and that the unsustainable development of some key economic sectors was the major barrier to further improvements. That remains the EEA's key conclusion despite significant progress on some issues demonstrating that environmental policy works. The next report is due in 2010 and the EEA intends to have played its part in reversing unsustainable trends in sectors such as energy, agriculture and transport. This report is in four parts: A an integrated assessment of the atmospheric, aquatic and terrestrial environment; B a core set of indicators including pollution, biodiversity, climate change, agriculture, energy, fisheries and transport; C country analysis; and D a bibliography of EEA publications since 2000.
