untechnical presentation of general features characterizing economically important species of wood It is the result of notes  
originally brought together from many already existing sources and later augmented and verified so far as possible for the  
present use by personal observation The work of preparation has not been as simple as the result would indicate and  
although great care has been taken to check each fact errors do no doubt exist although it is not believed that there are  
important ones Engineers while writing upon woods have save exceptionally emphasized strength beyond most other  
properties Other works for expert foresters or botanists are of necessity too special voluminous fragmental or technical for  
the casual student Some popular books on trees as distinct from woods are available The present form is distinct from these  
and is intended for those who are not foresters or botanists but who use woods or desire knowledge of their distinguishing  
properties Allusions to trees historical and other references aside from those directly regarding woods are made for
