Tao Of Objects:

The Tao of Objects Gary Entsminger, 1995 Introduces the concept of object oriented programming provides examples in C Delphi Visual Basic and dBASE for Windows and looks at current applications **Pattern-Oriented Software Architecture, Patterns for Concurrent and Networked Objects** Douglas C. Schmidt, Michael Stal, Hans Rohnert, Frank Buschmann, 2013-04-22 Designing application and middleware software to run in concurrent and networked environments is a significant challenge to software developers The patterns catalogued in this second volume of Pattern Oriented Software Architectures POSA form the basis of a pattern language that addresses issues associated with concurrency and networking The book presents 17 interrelated patterns ranging from idioms through architectural designs They cover core elements of building concurrent and network systems service access and configuration event handling synchronization and concurrency All patterns present extensive examples and known uses in multiple programming languages including C C and Java The book can be used to tackle specific software development problems or read from cover to cover to provide a fundamental understanding of the best practices for constructing concurrent and networked applications and middleware About the Authors This book has been written by the award winning team responsible for the first POSA volume A System of Patterns joined in this volume by Douglas C Schmidt from University of California Irvine UCI USA Visit our Web Page **Object Technologies for Advanced Software** Shojiro Nishio, 1993-10-07 This volume constitutes the proceedings of the First International Symposium organized by the Japan Society for Software Science and Technology The symposium was held in Kanazawa Japan November 4 6 1993 and attracted many researchers from academia and industry as well as ambitious practitioners Object technologies in particular object oriented programming object oriented databases and software object bases currently attract much attention and hold a great promise of future research and development in diverse areas of advanced software The volume contains besides 6 invited presentations by renown researchers and 25 contributed papers carefully selected by an international program committee from a total of 92 submissions **TAO** S. E. Mitchell, Andrew J. Wellings, 1994 Abstract This report proposes a method by which inheritance and concurrency can be combined in a single object oriented language whilst retaining simple to understand syntax and semantics We examine issues related to the design of a concurrent object oriented language and explain why we consider existing languages to be deficient Consequently an alternative implementation independent model called TAO is discussed and we detail why we consider that our particular model overcomes the perceived deficiencies in the previous work Finally future work in the shape of a proposed implementation of TAO is described *Distributed Information Resources* , 1999-07-26 Since its first volume in 1960 *Advances in Computers* has presented detailed coverage of innovations in hardware and software and in computer theory design and applications It has also provided contributors with a medium in which they can examine their subjects in greater depth and breadth than that allowed by standard journal articles As a result many articles have become standard references

The Oxford Handbook of Christology Francesca Aran Murphy,2015-09-24 The Oxford Handbook of Christology brings together 40 authoritative essays considering the theological study of the nature and role of Jesus Christ This collection offers dynamic perspectives within the study of Christology and provides rigorous discussion of inter confessional theology which would not have been possible even 60 years ago The first of the seven parts considers Jesus Christ in the Bible Rather than focusing solely on the New Testament this section begins with discussion of the modes of God s self communication to us and suggests that Christ s most original incarnation is in the language of the Hebrew Bible The second section considers Patristics Christology These essays explore the formation of the doctrines of the person of Christ and the atonement between the First Council of Nicaea in 325 and the eve of the Second Council of Nicaea The next section looks at Mediaeval theology and tackles the development of the understanding of who Christ was and of his atoning work The section on Reformation and Christology traces the path of the Reformation from Luther to Bultmann The fifth section tackles the new developments in thinking about Christ which have emerged in the modern and the postmodern eras and the sixth section explains how beliefs about Jesus have affected music poetry and the arts The final part concludes by locating Christology within systematic theology asking how it relates to Christian belief as a whole This comprehensive volume provides an invaluable resource and reference for scholars students and general readers interested in the study of Christology
