**A Day in the Life of a Test Pilot** Michael McKeever, Georgeanne Irvine, 1991 Depicts the daily work of Major Dana Purifoy a test pilot who spends part of each day testing airplanes for the Air Force **Test Pilot** Brian Johnson, 2011-06-20 Test pilots dashing and courageous young men or foolhardy gamblers In this fully illustrated book written by the producer of the BBC1 television series of the same name we follow the ups and downs of a group of trainee test pilots at Boscombe Down in Wiltshire Beginning with the exacting selection procedure we discover what personal and professional qualities a pilot needs in order to become a test pilot Only six UK and twelve foreign students are chosen each year and once selected the pressure on them steadily mounts As the students learn to push each aircraft's performance to its limits they too are being mentally and physically stretched further than ever before Training is given on both fixed and rotary wing aircraft and by the end of the course each student is fully conversant with the different techniques necessary to fly each type They learn how to recover safely from spins how to cope with sudden failures of equipment in mid flight and how to land an aircraft with no power All the time they are assessing each aircraft's capabilities and the scope of the on board technology The final part of the course is the preview exercise when every student is required to evaluate an aircraft he has never flown before and to make a formal presentation to his tutors and examiners Using a number of remarkably frank interviews with students and tutors Brian Johnson explores the process of becoming a test pilot and reveals both the stresses and successes of the year The RAF has given its full support to both the book and the television programmes and thus has enabled Brian Johnson to produce a unique and authoritative account of the training for one of the most responsible and exciting jobs in modern aviation **Test Pilot** Keith Elliot Greenberg, 1997 Profiles the training and career of Major Rex Bailey who tests military airplanes for the United States Air Force at Edwards Air Force Base in California **Vulcan Test Pilot** Tony Blackman, 2007-08-19 In this memoir the author of Nimrod Rise and Fall details his experience testing the UK's strategic bomber while flying for Avro during the Cold War In 2007 a restored Avro Vulcan Mark 2 XH558 took to the skies to help commemorate the 25th anniversary of the Falklands conflict To coincide with this the memoirs of one of its test pilots Tony Blackman was published to great acclaim Tony flew no less than 105 of the 136 built logging 850 flights at over 1 327 hours His book describes in layman's terms what it was like to tame the first prototypes of the monumental delta wing aircraft and to master the unusual characteristics necessitated by the Vulcan's shape Although Tony puts the developments demonstrations incidents and accidents in their political and historical context his story is a highly personal one He explains how this awesome aircraft became a national treasure and captured the imagination of the whole country His words descriptions and photographs will make people feel as he did the excitement of handling such an incredibly powerful monster always in the knowledge that he had to be always in complete control of the monster as it could and did bite back Praise for Vulcan Test Pilot Highly readable keeping both the technical reader interested without perplexing the layman A fine book for

Clarence L Kelly Johnson remains the world's fastest jet. It took a test pilot with the right combination of intelligence, skill, and nerve to make the first flight of the SR-71, and the thirty-eight-year-old Gilliland had spent much of his life pushing the edge. In *Speed*, one of America's greatest test pilots collaborates with acclaimed journalist Keith Dunnivant to tell his remarkable story: How he was pushed to excel by his demanding father; how a lucky envelope at the U.S. Naval Academy altered the trajectory of his life; how he talked his way into U.S. Air Force fighters at the dawn of the jet age despite being told he was too tall; how he made the conscious decision to trade the security of the business world for the dangerous life of an experimental test pilot, including time at the clandestine base Area 51 working on the Central Intelligence Agency's Oxcart program. The narrative focuses most intently on Gilliland's years as the chief test pilot of the SR-71 as he played a leading role in the development of the entire fleet of spy planes while surviving several emergencies that very nearly ended in disaster. Waging the Cold War at 85,000 feet, the SR-71 became an unrivaled intelligence-gathering asset for the U.S. Air Force, invulnerable to enemy defenses for a quarter century. Gilliland's work with the SR-71 defined him especially after the Cold War when many of the secrets began to be revealed and the plane emerged from the shadows not just as a tangible museum artifact but as an icon that burrowed deep into the national consciousness. Like the Blackbird itself, *Speed* is a story animated by the power of ambition and risk-taking during the heady days of the American Century.

**Trailblazers** Christopher Hounsfield, 2009-03-09. Flight testing experimental and new aircraft is one of the world's most hazardous occupations. A test pilot requires the skills of a flying ace while maintaining the self-control and mental discipline of a scientist. They are a rare breed, carefully selected for their experience and intelligence, let alone their bravery. This book contains a series of exclusive, fascinating anecdotes written by some of the world's best flying, iconic aircraft during the extensive experimental flights that must take place before a type can enter service. Each story is a unique insight into these modern-day technological explorers. From Concorde to the Phantom jet, Spitfire to the U-2 spy plane.
