XploRe — Learning Guide W. Härdle, S. Klinke, M. Müller, 2012-12-06 It is generally accepted that training in statistics must include some exposure to the mechanics of computational statistics This learning guide is intended for beginners in computer aided statistical data analysis The prerequisites for XploRe the statistical computing environment are an introductory course in statistics or mathematics The reader of this book should be familiar with basic elements of matrix algebra and the use of HTML browsers This guide is designed to help students to XploRe their data to learn via data interaction about statistical methods and to disseminate their findings via the HTML outlet The XploRe APSS Auto Pilot Support System is a powerful tool for finding the appropriate statistical technique quantlet for the data under analysis Homogeneous quantlets are combined in XploRe into quantlibs The XploRe language is intuitive and users with prior experience of other statistical programs will find it easy to reproduce the examples explained in this guide The quantlets in this guide are available on the CD ROM as well as on the Internet The statistical operations that the student is guided into range from basic one dimensional data analysis to more complicated tasks such as time series analysis multivariate graphics construction microeconometrics panel data analysis etc The guide starts with a simple data analysis of pullover sales data then introduces graphics The graphics are interactive and cover a wide range of displays of statistical data [Guide to Information Sources in Mathematics and Statistics](#) Martha A. Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free **Handbook of Computational Statistics** Yuichi Mori, 2004-07-14 The Handbook of Computational Statistics Concepts and Methodology is divided into four parts It begins with an overview over the field of Computational Statistics The second part presents several topics in the supporting field of statistical computing Emphasis is placed on the need of fast and accurate numerical algorithms and it discusses some of the basic methodologies for transformation data base handling and graphics treatment The third part focuses on statistical methodology Special attention is given to smoothing iterative procedures simulation and visualization of multivariate data Finally a set of selected applications like Bioinformatics Medical Imaging Finance and Network Intrusion Detection highlight

the usefulness of computational statistics

Computational Science — ICCS 2004 Marian Bubak, Geert D. van Albada, Peter M.A. Sloot, Jack Dongarra, 2004-05-25 The International Conference on Computational Science ICCS 2004 held in Krakow Poland June 6-9 2004 was a follow up to the highly successful ICCS 2003 held at two locations in Melbourne Australia and St Petersburg Russia ICCS 2002 in Amsterdam The Netherlands and ICCS 2001 in San Francisco USA As computational science is still evolving in its quest for subjects of investigation and efficient methods ICCS 2004 was devised as a forum for scientists from mathematics and computer science as the basic computing disciplines and application areas interested in advanced computational methods for physics chemistry life sciences engineering arts and humanities as well as computer system vendors and software developers The main objective of this conference was to discuss problems and solutions in all areas to identify new issues to shape future directions of research and to help users apply various advanced computational techniques The event harvested recent developments in computational grids and next generation computing systems tools advanced numerical methods data driven systems and novel application fields such as complex systems nanotechnology physics and population evolution
