Wave Forms A Natural Syntax For Rhythmic Language:

Wave Forms James H. Bunn, 2002 In this daring book the author proposes that artistic and literary forms can be understood as modulations of wave forms in the physical world By the phrase natural syntax he means that physical nature enters human communication literally by way of a transmitting wave frequency This premise addresses a central question about symbolism in this century How are our ideas symbolically related to physical reality The author outlines a theory of communication in which nature is not reached by reference to an object rather nature is part of the message known only tacitly as the wavy carrier of a sign or signal One doesn't refer to nature even though one might be aiming to one refers with nature as carrier vehicle The author demonstrates that a natural language of transmission has an inherent physical syntax of patterned wave forms which can also be described as certain laws of form a phrase used by D Arcy Thompson L L Whyte Noam Chomsky and Stephen Jay Gould He describes a syntax inherent in natural languages that derives from the rhythmic form of a propelling wave Instead of the laws of a wave's form however the author speaks of its elements of rhythmic composition because *rythmos* means wave in Greek and because composition describes the creative process across the arts In pursuing a philosophy of rhythmic composition the author draws on cognitive science and semiotics But he chiefly employs symmetry theory to describe the forms of art and especially the patterns of poetry as structures built upon the natural syntax of wave forms

From Mimetic Translation to Artistic Transduction Dinda Gorlée, 2023-10-03 Roman Jakobson gave a literary translation of the double words and concepts of poetical hyper translation Language can transmit verbal translation to explore new ways of thinking about music and other arts Thomas A Sebeok deconstructed the energy of translation into the duplicated genres of artistic transduction In semiotics transduction is a technical expression involving music theater and other arts Jakobson used Saussure's theory to give a single meaning in a different art but with other words and sounds later followed by Peirce's dynamic energy with a floating sensation of the double meaning of words and concepts For semiotician Peirce literary translation becomes the graphical vision of ellipsis parabole and hyperbole Ellipsis is illustrated by Virginia Woolf's novel *The Waves* to give a political transformation of Wagner's opera *Das Rheingold* Parabole is illustrated by the two lines of thought of Hector Berlioz He neglected his own translation of Virgil's *Aeneid* when he retranslated the vocal text to accompany the musical lyrics of his opera *The Trojans* Hyperbole is demonstrated by Bertold Brecht's auto translation of Gay's *The Beggar's Opera* In the cabaret theater of *The Three penny Opera* Brecht recreated his epic hyper translation by retranslating the language of the folk speech of the German working classes with the jargon of criminal slang

Rhythm
Lexi Eikelboom, 2018-08-29 *Rhythm A Theological Category* argues that as a pervasive dimension of human existence with theological implications rhythm ought to be considered a category of theological significance Philosophers and theologians have drawn on the category of rhythm patterned movements of repetition and variation to describe reality however the ways

in which rhythm is used and understood differ based on a variety of metaphysical commitments with varying theological implications Lexi Eikelboom brings those implications into the open through using resources from phenomenology prosody and the social sciences to analyse and evaluate uses of rhythm in metaphysical and theological accounts of reality The analysis relies on a distinction from prosody between a synchronic approach to rhythm which observes the whole at once and considers how various dimensions of a rhythm hold together harmoniously and a diachronic approach which focuses on the ways in which time unfolds as the subject experiences it Based on an engagement with the twentieth century Jesuit theologian Erich Przywara alongside thinkers as diverse as Augustine and the contemporary philosopher Giorgio Agamben Eikelboom proposes an approach to rhythm that serves the concerns of theological conversation It then demonstrates the difference that including rhythm in such theological conversation makes to how we think about questions such as what is creation and what is the nature of the God creature relationship from the perspective of rhythm As a theoretical category capable of expressing metaphysical commitments yet shaped by the cultural rhythms in which those expressing such commitments are embedded rhythm is particularly significant for theology as a phenomenon through which culture and embodied experience influence doctrine

Semiotic Rotations SunHee Kim Gertz, Jaan Valsiner, Jean-Paul Breaux, 2007-01-24 This volume explores interdisciplinary semiotics through geographical metaphors uncovering meanings via shifting perspectives It examines how modes of meaning are articulated in cultural contexts revealing relationships between open and closed systems of signification and modulating shades of meaning between visible and invisible

Game Over? Christophe Chalamet, Andreas Dettwiler, Mariel Mazzocco, Ghislain Waterlot, 2017-09-11 Modern science informs us about the end of the universe game over is the message which lies ahead of our world Christian theology on the other hand sees in the end not the cessation of all life but rather an invitation to play again in God's presence Is there a way to articulate together such vastly different claims Eschatology is a theological topic which merits being considered from several different angles This book seeks to do this by gathering contributions from esteemed and fresh voices from the fields of biblical exegesis history systematic theology philosophy and ethics How can we make sense today of Jesus and the New Testament's eschatological message How did he his early disciples and the Christian tradition envision the end of the world Is there a way for us to articulate together what modern science tells us about the end of the universe with the biblical and Christian claims about God who judges and who will wipe every tear Eschatology has been at the heart of Christian theology for 100 years in the West What should we do with this legacy Are there ways to move our reflection forward in our century Scholars and other interested readers will find here a wealth of insights
