*The Crowd in the Early Middle Ages* Shane Bobrycki, 2024-11-19 The importance of collective behavior in early medieval Europe By the fifth and sixth centuries the bread and circuses and triumphal processions of the Roman Empire had given way to a quieter world And yet as Shane Bobrycki argues the influence and importance of the crowd did not disappear in early medieval Europe In *The Crowd in the Early Middle Ages* Bobrycki shows that although demographic change may have dispersed the urban multitudes of Greco Roman civilization collective behavior retained its social importance even when crowds were scarce Most historians have seen early medieval Europe as a world without crowds In fact Bobrycki argues early medieval European sources are full of crowds although perhaps not the sort historians have trained themselves to look for Harvests markets festivals religious rites and political assemblies were among the gatherings used to regulate resources and demonstrate legitimacy Indeed the refusal to assemble and other forms of slantwise assembly became a weapon of the powerless Bobrycki investigates what happened when demographic realities shifted but culture religion and politics remained bound by the past The history of crowds during the five hundred years between the age of circuses and the age of crusades Bobrycki shows tells an important story one of systemic and scalar change in economic and social life and of reorganization in the world of ideas and norms

Sultan Özge Yaldiz, 2014-10-13 Bachelor Thesis from the year 2014 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 Westfälische Hochschule Gelsenkirchen Bocholt Recklinghausen language English abstract At large innovation is a key factor for the success and persistence of organizations in today's business In order to develop successful innovation information of two kinds is needed information based on customers and the market's needs as well as information on how to transform the gained knowledge into corresponding products Diener and Piller 2011 The paradigm of Crowdsourcing can be applied to obtain both kinds of essential information enabled through direct interaction with customers and takers providing an enhanced inflow of intelligence The work at hand deals with Crowdsourcing and particularly crowd based product innovation Crowdsourcing is a relatively new conceptualized paradigm which is why the literature does not offer countless research papers on the topic and the market is not overloaded with companies applying the concept although the theory is very promising Nonetheless not all companies who have ventured the step towards Crowdsourcing have experienced positive outcomes on the contrary some encountered rants from the crowd as well as image losses Papsdorf and Vo 2009 The first purpose of this work is to illustrate how broad the term Crowdsourcing is and what opportunities it offers for businesses by providing an overview of the common forms a further purpose is to depict where in what form and how those activities take place The cornerstones for a successful outcome are already set at the beginning of a project whereby this paper describes single decisions to make along a Crowdsourcing process and their influence on the project's course in order to understand how and why each decision during the process can be determining thus marking a third purpose The focus of this third purpose is on Crowd Innovation leading to the primary purpose namely to identify and name essential factors for the success of a crowd product innovation project in Web 2.0 These factors will demonstrate which steps and rules have to be followed by a company to implement prosperous Crowdsourcing activities in this field
