**Predestination** Dag Heward-Mills,2022-04-20 There is clear evidence in the Bible that things are determined beforehand Believing in predestination means that you believe that no one has any real control of events but that everything has already been decided by God s plan and purpose On the other hand there is also evidence that God gives us our free will and allows us the freedom to choose between good and evil The concept of predestination is difficult to grasp because of the way circumstances play out But predestination is real It is time for you to understand predestination so that you can work with God and walk with God more easily Another thought provoking masterpiece by celebrated author Dag Heward Mills Trust God and watch the outplaying of all the things that God has destined for you      **The Origin of Space Stars Planets and Life** Gary Weise,2009-06      *Better Humans?* Michael Hauskeller,2014-09-11 Developments in medical science have afforded us the opportunity to improve and enhance the human species in ways unthinkable to previous generations Whether it s making changes to mitochondrial DNA in a human egg being prescribed Prozac or having a facelift our desire to live longer feel better and look good has presented philosophers medical practitioners and policy makers with considerable ethical challenges But what exactly constitutes human improvement What do we mean when we talk of making better humans In this book Michael Hauskeller explores these questions and the ideas of human good that underpin them Posing some challenging questions about the nature of human enhancement he interrogates the logic behind its processes and examines the justifications behind its criteria Questioning common assumptions about what constitutes human improvement

Hauskeller asks whether the criteria proposed by its advocates are convincing The book draws on recent research as well as popular representations of human enhancement from advertising to the internet and provides a non technical and accessible survey of the issues for readers and students interested in the ethics and politics of human enhancement
