Cardiac Glycosides Kurt Greeff, 2012-12-06 Following the monographs by STRAUB 1924 and LENDLE 1935 this is the third contribution to the Pharmacology of Cardiac Glycosides within the Handbook of Experimental Pharmacology which was founded by ARTHUR HEFFTER and continued by WOLFGANG HEUBNER Because of the need created by the length of time that had elapsed since LENDLE'S work the editorial board requested the rapid appearance of this 56th volume which represents current knowledge of the pharmacology and clinical pharmacology of cardiac glycosides In order to avoid any delay numerous authors were invited to contribute because shorter contributions take less time to prepare and are consequently more up to date The disadvantage is that some overlap between certain chapters could not be avoided despite the editor's efforts Overlapping can however actually be useful in that differing opinions may be provided and topical issues discussed from varying viewpoints This reminds the reader that scientific horizons in medicine should often be widened or revised I would like to thank DR ALANNA Fox and DR K ANANTHARAMAN for their help and advice in the revision of certain chapters I am also grateful to Springer Verlag and particularly to MR WINSTANLEY and MR EMERSON for their contribution to the completion of this volume through translation and corrections In conclusion I would like to thank MRS WALKER

Michael S A Graziano, 2019-09-17 A first class intellectual adventure Brian Greene author of *Until the End of Time* Illuminating his groundbreaking theory of consciousness known as the attention schema theory Michael S A Graziano traces the evolution of the mind over millions of years with examples from the natural world to show how neurons first allowed animals to develop simple forms of attention and then to construct awareness of the external world and of the self His theory has fascinating implications for the future it may point the way to engineers for building consciousness artificially and even someday taking the natural consciousness of a person and uploading it into a machine for a digital afterlife **The Na,**
