Public Law Adjudication in Common Law Systems John Bell, Mark Elliott, Jason NE Varuhas, Philip Murray, 2016-04-07 This volume arises from the inaugural Public Law Conference hosted in September 2014 by the Centre for Public Law at the University of Cambridge which brought together leading public lawyers from a number of common law jurisdictions While those from such jurisdictions share background understandings significant differences within the common law world create opportunities for valuable exchanges of ideas and debate This collection draws upon one of the principal sub themes that emerged during the conference namely the the way in which relationships and distinctions between the notions of process and substance play out in relation to and inform adjudication in public law cases The essays contained in this volume address those issues from a variety of perspectives While the bulk of the chapters consider topical issues in judicial review either on common law or human rights grounds or both other chapters adopt more theoretical historical empirical or contextual approaches Concluding chapters reflect generally on the papers in the collection and the value of facilitating cross jurisdictional dialogue

Democratic Dialogue and the Constitution Alison L Young, 2017-04-14

Constitutions divide into those that provide for a constitutionally protected set of rights where courts can strike down legislation and those where rights are protected predominantly by parliament where courts can interpret legislation to protect rights but cannot strike down legislation The UK s Human Rights Act 1998 is regarded as an example of a commonwealth model of rights protections It is justified as a new form of protection of rights which promotes dialogue between the legislature and the courts dialogue being seen not just as a better means of protecting rights but as a new form of constitutionalism occupying a middle ground between legal and political constitutionalism This book argues that there is no clear middle ground for dialogue to occupy with most theories of legal and political constitutionalism combining legal and political protections as well as providing an account of interactions between the legislature and the judiciary Nevertheless dialogue has a role to play It differs from legal and political constitutionalism in terms of the assumptions on which it is based and the questions it asks It focuses on analysing mechanisms of inter institutional interactions and assessing when these interactions can provide a better protection of rights facilitate deliberation engage citizens and act as an effective check and balance between institutions of the constitution This book evaluates dialogue in the UK constitution assessing the protection of human rights through the Human Rights Act 1998 the common law and EU law It also evaluates court court dialogue between the UK court the European Court of Justice and the European Court of Human Rights The conclusion evaluates the implications of the proposed British Bill of Rights and the referendum decision to leave the European Union
