It defines workplace spirituality as all aspects of the workplace that promote individual feelings of satisfaction through a sense of connection to a larger force.

Membrane Protein-Cytoskeleton Interactions, 1996-11-21 The plasma membrane acts as both a boundary and a site of exchange between the outside and the inside of a cell. The cytoskeleton plays essential roles in delineating membrane protein distributions in defining structural and functional domains in the plasma membrane and in regulating membrane protein and ultimately cell function. This volume reviews the regulation of membrane protein distribution, organization and function at the plasma membrane by the cytoskeleton. Discussions also include the roles of cytoskeleton in the structural and functional organization of membranes and membrane proteins with emphasis on key problems, the current status of understanding, experimental approaches and future directions. *Computer Vision - ECCV 2024* Aleš Leonardis, Elisa Ricci, Stefan Roth, Olga Russakovsky, Torsten Sattler, Gül Varol, 2024-11-26 The multi volume set of LNCS books with volume numbers 15059 up to 15147 constitutes the refereed proceedings of the 18th European Conference on Computer Vision ECCV 2024 held in Milan, Italy during September 29-October 4, 2024. The 2387 papers presented in these proceedings were carefully reviewed and selected from a total of 8585 submissions. The papers deal with topics such as computer vision, machine learning, deep neural networks, reinforcement learning, object recognition, image classification, image processing, object detection, semantic segmentation, human pose estimation, 3D reconstruction, stereo vision, computational photography, neural networks, image coding, image reconstruction, motion estimation. *Human-Centred Software Engineering* Regina Bernhaupt, Peter Forbrig, Jan Gulliksen, Marta Kristín Lárusdóttir, 2010-10-06 The conference series HCSE Human Centred Software Engineering was established four years ago in Salamanca. HCSE 2010 is the third working conference of IFIP Working Group 13.2 Methodologies for User Centered Systems Design. The goal of HCSE is to bring together researchers and practitioners interested in strengthening the scientific foundations of user interface design, examining the relationship

between software engineering and human computer interaction and focusing on how to strengthen user centered design as an essential part of software engineering processes As a working conference substantial time was devoted to the open and lively discussion of papers The interest in the conference was positive in terms of submissions and participation We received 42 contributions that resulted in 10 long papers 5 short papers and 3 poster papers The selection was carried out carefully by the International Program Committee The result is a set of interesting and stimulating papers that address such important issues as contextual design user aware systems ubiquitous environments and usability evaluation The final program of the conference included a keynote by Liam Bannon with the title Approaches to Software Engineering A Human Centred Perspective This talk raised a lot of interesting questions for IFIP WG 13.2 and might have had some impact for participants to become a member of the working group We hope that participants considered HCSE 2010 as successful as its two predecessors in terms of interesting discussions and new ideas for scientific cooperation
