Small Fish:

Small fish for food security and nutrition Food and Agriculture Organization of the United Nations, 2023-11-13 Food insecurity hunger and malnutrition have been on the rise in recent years due to disruptions such as the COVID 19 pandemic increasing climate shocks and conflicts Decades of steady progress to reduce food insecurity and malnutrition were often attributed to increased food production and intensification of few food staple crops and livestock however more recent focus has shifted to the role of small scale producers and the importance of diverse and nutritious foods This technical paper brings focus to the often overlooked small fish which play an integral role in the food security nutrition and livelihoods of the small scale fisherfolk who harvest process market trade and distribute small fish to communities near and far from water bodies The technical paper explores the various dimensions of the small fish food system addressing drivers scales interactions and multiple outcomes and trade offs such as that of small fish used for food versus feed Throughout the work applies a human centred perspective emphasizing how people are involved in various stages of a food system and how interactions and networks between them play a role in food system dynamics and outcomes It is also emphasizes how people play multiple roles within a food system and thus should not be narrowly defined as fishers processors or consumers The paper documents project implementation and lessons from the FAO subprogramme titled Implementing the Small Scale Fisheries Guidelines for gender equitable and climate resilient food systems and livelihoods and the SmallFishFood Ikan F3 Dried Fish Matters and Fish4Food projects led by the University of Bergen the University of Amsterdam and the University of Manitoba
