Seel,Robert D. Tennyson,Norbert M. Seel,2014-03-18 Instructional design theory and practice has evolved over the past 30  
years from an initial narrow focus on programmed instruction to a multidimensional field of study integrating psychology  
technology evaluation measurement and management The growth of instructional design ID has occurred because of direct  
needs problems and goals from society Its application in planning instruction first developed in the United States with the  
Department of Defense during World War II with the purpose of meeting immediate concerns for effective training of larger  
numbers of military personnel From the beginning ID has rapidly expanded into applications in industrial and executive  
training vocational training classroom learning and professional education Although ID has its roots in the U S applications  
and theoretical growth is an international activity However literature at the international level is still limited to either  
individual author contributions or collections primarily represented by single countries As a result there is no standard  
reference source that contains the rich variety of theories and applications to form the international foundation for the field  
The goal of this two volume set is to establish international foundations for ID theory research and practice within the  
framework of the two following objectives to identify and define the theoretical research and model foundations for ID and to  
bridge the gap between ID foundations and application Volume I includes chapters on philosophical and theoretical issues on  
learning theory and ID models Volume II provides an overview of the state of the art of solving ID problems The contributors  
offer contrasting points of view which provide a rare opportunity to see the diversity and complexity in the field The editorial  
committee has selected a wide range of internationally known authors to make presentations in the topic areas of the field
