Unity, 1919 *Commonsense Darwinism* John Lemos, 2015-11-09 Written in a simple accessible style **Commonsense Darwinism** offers a clear critical examination of the subject Assuming that the diversity of life including human beings is the result of evolution from common origins and that its driving force is natural selection the book explores what this might mean for issues in ethics philosophy of religion epistemology and metaphysics The author s defense of free will makes this an especially stimulating read

HISTORY OF ANIMALS Aristotle, 1965 **HISTORY OF ANIMALS** by Aristotle translated by D Arcy Wentworth Thompson Book I 1 OF the parts of animals some are simple to wit all such as divide into parts uniform with themselves as flesh into flesh others are composite such as divide into parts not uniform with themselves as for instance the hand does not divide into

hands nor the face into faces And of such as these some are called not parts merely but limbs or members Such are those parts that while entire in themselves have within themselves other diverse parts as for instance the head foot hand the arm as a whole the chest for these are all in themselves entire parts and there are other diverse parts belonging to them All those parts that do not subdivide into parts uniform with themselves are composed of parts that do so subdivide for instance hand is composed of flesh sinews and bones Of animals some resemble one another in all their parts while others have parts wherein they differ Sometimes the parts are identical in form or species as for instance one man s nose or eye resembles another man s nose or eye flesh flesh and bone bone and in like manner with a horse and with all other animals which we reckon to be of one and the same species for as the whole is to the whole so each to each are the parts severally In other cases the parts are identical save only for a difference in the way of excess or defect as is the case in such animals as are of one and the same genus By genus I mean for instance Bird or Fish for each of these is subject to difference in respect of its genus and there are many species of fishes and of birds
