Social Problems: A Critical Approach Kenneth J. Neubeck, Mary Alice Neubeck, Davita Silfen Glasberg, 2006-04-06. This critical approach to the analysis of social problems facing the world today examines both the causes of those problems and their human implications. The fifth edition has been reorganized into four types of social problems. Four chapters look at large societal problems involving arrangements of social structures that have a vast impact on how societies operate and the effect of this on the life chances of millions of people. Five chapters focus on group problems created by social arrangements and relations. Four chapters focus on institutional problems that derive from the way that social institutions are arranged to address the basic needs of social survival that often benefit some members of society more than others, and the final three chapters focus on individual problems such as criminal behavior, mental illness, and substance abuse. *Catalog* Washburn University of Topeka, 1921.
