The Mobile Agent Rendezvous Problem in the Ring Evangelos Kranakis, Danny Krizanc, Euripides Marcou, 2022-05-31

Mobile agent computing is being used in fields as diverse as artificial intelligence computational economics and robotics Agents ability to adapt dynamically and execute asynchronously and autonomously brings potential advantages in terms of fault tolerance flexibility and simplicity This monograph focuses on studying mobile agents as modelled in distributed systems research and in particular within the framework of research performed in the distributed algorithms community It studies the fundamental question of how to achieve rendezvous the gathering of two or more agents at the same node of a network Like leader election such an operation is a useful subroutine in more general computations that may require the agents to synchronize share information divide up chores etc The work provides an introduction to the algorithmic issues raised by the rendezvous problem in the distributed computing setting For the most part our investigation concentrates on the simplest case of two agents attempting to rendezvous on a ring network Other situations including multiple agents faulty nodes and other topologies are also examined An extensive bibliography provides many pointers to related work not covered in the text The presentation has a distinctly algorithmic rigorous distributed computing flavor and most results should be easily accessible to advanced undergraduate and graduate students in computer science and mathematics departments

The Thirty Eight Years of the Republic of China in the Mainland MAO Min, This is Selected topic 7 of the Selected Topics from The Revival of China The full book is about the revival of China in the 20th century and the first decade of the 21st century This topic is about the thirty eight years of the Republic of China in the mainland It covers the Xinhai Revolution overthrowing of the Qing dynasty establishment of the Republic of China Warlord rulings of China cooperation between GMD and CPC unification of China by JIANG Jie shi encircle and suppress the Red Army led by CPC anti Japanese fights after the September 18th accident the Anti Japanese War decisive battles with CPC and withdrawing from the mainland to Taiwan Island In the Appendix situation of Republic of China in Taiwan is described

The Revival of China MAO Min, The book is about the revival of China in the 20th century and the first decade of the 21st century It has eight parts 1 The civil revolution in China 2 The countryside bases 3 The Long March of the Red Army 4 The Anti Japanese War 5 Decisive civil battles before the establishment of the People s Republic of China 6 The Mao Era before the Great Cultural Revolution 7 The Great Cultural Revolution and 8 The Reform and opening up This version of the book is without pictures

Formal Aspects of Component Software Farhad Arbab, Sung-Shik Jongmans, 2020-02-12 This book constitutes the thoroughly revised selected papers from the 16th International Conference on Formal Aspects of Component Software FACS 2019 held in Amsterdam The Netherlands in October 2019 The 9 full papers presented together with 9 full papers and 3 short papers as well as 2 other papers were carefully reviewed and selected from

27 submissions FACS 2019 is concerned with how formal methods can be used to make component based and service oriented software development succeed Formal methods have provided a foundation for component based software by successfully addressing challenging issues such as mathematical models for components composition and adaptation or rigorous approaches to verification deployment testing and certification *The Massachusetts register* ,2006 **The**

Decisive Battles before establishment of the People's Republic of China MAO Min, This is Part 5 of the book entitled The Revival of China The full book is about the revival of China in the 20th century and the first decade of the 21st century This part of the book records the decisive battles in the civil war before the establishment of the People s Republic of China

Hipparcos, the New Reduction of the Raw Data Floor van Leeuwen,2007-09-23 The publication of the Hipparcos and Tycho Catalogues in 1997 transformed astrometry and as a consequence astronomers perception of astrometry What had before often been regarded as a somewhat quaint specialty of limited relevance to modern astrophysics was suddenly seen to produce a wealth of data of immediate practical use The ready availability of many thousand precise trigonometric stellar distances and the access to an accurate and dense tical reference frame have changed the way astronomers think about certain problems and plan their experiments Inevitably the exploitation of so much new data not only solved some old problems tidied up several confused areas and sharpened many observational constraints but it also generated new qu tions about established theory and about the data themselves The author of this book has taken a radical approach to answer some of these questions a complete re examination of the satellite data and the models used to represent them in particular the attitude modelling Eventually this resulted in the new and very signi cantly improved Hipparcos reduction described in this book This remarkable achievement was made possible by a combination of many factors including time and the exponential growth of computing power but mainly an incredible amount of detailed tedious and ingenious work by the author and the resulting insight into what really went on with the satellite in its unhappy orbit Dr **"Code of Massachusetts**
