

AREA OF SQUARE

$$\text{Area} = a \times a$$

$$\text{Perimeter} = a + a + a + a$$

$$\text{Area} = 2 \times 2 = 4 \text{ cm}^2$$

$$\text{Perimeter} = 2 + 2 + 2 + 2 = 8 \text{ cm}$$

What Is Square

Daniel F McAuley

What Is Square:

What is Knowledge? Jose Ortega y Gasset, 2002-01-01 Appearing in English for the first time this book comprises two of Ortega's most important works *Qu es conocimiento* and the essay *Ideas y creencias* This is Ortega's attempt to systematically present the foundations of his metaphysics of human life and on that basis to provide a radical philosophical account of knowledge In so doing he criticizes idealism and overcomes it Accordingly this book goes well beyond a treatise on epistemology in fact as understood in modern philosophy this discipline and its questions are shown to be derivative and in that sense they are transcended here by Ortega's systematic effort Written during the time of his maturity these works are representative of his fruitful and radical period Both *Qu es conocimiento* and *Ideas y creencias* are equally decisive not only for the understanding and radical completion of Ortega's work but also for their relevance to the work of continental philosophers during the same period and for years to come e.g. Husserl, Jaspers, Heidegger, Sartre and others **The**

Concept of Meaninglessness Edward Erwin, 2019-12-01 Originally published in 1970 Many contemporary philosophers have thought that certain philosophic disputes could be settled by using the concept of meaninglessness To solve philosophic problems in this way however it seemed necessary to provide a reliable criterion for deciding when a particular sentence or statement is meaningless But devising such a criterion has proved to be very difficult In fact in recent years many philosophers have become quite skeptical about the adequacy of the standard criteria of meaninglessness Some of the more radical skeptics have even argued that the concept of meaninglessness as it is used by philosophers is itself defective and would be even if an adequate criterion could be found Professor Erwin in a systematic study of the concept of meaninglessness begins by examining the standard criteria of meaninglessness proposed by philosophers These criteria include operationalist, verificationist and type or category criteria Each of these criteria he argues is inadequate Erwin then turns to the question What kinds of items if any should be said to be meaningless Most philosophers concerned with this question have claimed that only sentences not statements or propositions can be meaningless Erwin argues however that this is wrong statements and propositions can be meaningless Once this is demonstrated it can then be shown that the more radical skepticism about the philosophic use of the concept of meaninglessness is misguided In particular Erwin shows that the following assertions of the radical skeptic are false that what is meaningless is relative to a given language or to a given time and that the concept of meaninglessness forces us to condemn as nonsense metaphors comprehensible to competent speakers of English In his concluding chapter Erwin considers the implications of there not being any adequate general criterion of meaninglessness He then tries to show how the concept of meaninglessness when interpreted in the manner he suggests can be profitably used by philosophers despite the many persuasive objections to its use that philosophers have raised in their disputes over it *Mechanics' and Engineers' Pocketbook of Tables* Charles Haynes Haswell, 1890 **Learn**
