Sprayed Concrete Technology:

Sprayed Concrete Technology Simon Austin,2002-11-01 The process of spraying concrete is one of the most versatile concrete placing techniques and is used in a wide range of applications from construction of new tunnels domes tanks and pools to repair and strengthening of existing structure The steady growth in interest and application in the technique is reflected in this book which brings t Sprayed Concrete S. A. Austin,1995 This work covers the design installation and performance of sprayed concrete It includes information on materials technology plus detailed applications to rock stabilization and support tunnelling refractories fire damage repair and repair of retaining walls arches and curved roofs

Shotcrete Dudley Robert Morgan,Marc Jolin,2022-03-29 Shotcrete Materials Performance and Use is a comprehensive textbook covering the current state of the art shotcrete technology It provides an overview of the many and various uses of shotcrete Shotcrete is well suited for construction of curvilinear structures domes shells bobsleigh luge tracks etc and overhead shotcrete applications seismic retrofit repairs ground support etc that could not be constructed technically and or economically using conventional formed cast in place concrete construction methods It contains chapters on history shotcrete materials and mixture proportioning performance shotcrete research equipment and shotcrete application It is also comprised of shotcrete case history examples including buildings and structures infrastructure repair and rehabilitation ground support and shoring underground support in tunnels and mines swimming pools and spas and finally architectural shotcrete This text should be of interest to design engineers and architects considering the use of the technology as well as academics It serves as a useful guide to contractors using shotcrete in one or more of its many and various applications

Sprayed Concrete Lined Tunnels Alun Thomas,2019-08-20 Sprayed concrete lined SCL tunnels are growing rapidly in popularity due to their versatility The design and construction of both hard rock and soft ground tunnels has been revolutionised by the advent of the SCL method and now the use of permanent sprayed concrete linings has unlocked the true potential of the method to minimise construction costs and times Yet the complex early age behaviour of the sprayed concrete makes the design difficult and requires a robust management system during construction Consequently the great advantages of the method must be balanced against the risks as a few high profile tunnel collapses have illustrated Practising engineers on site in the design office or in client organizations will find this book an excellent introduction It covers all aspects of SCL tunnelling from the constituents of sprayed concrete to detailed design and management during construction Although there is a close interdependence between all the facets of sprayed concrete few engineers have the

right breadth of experience and expertise to cover all of them This urgently needs to be transferred to the wider engineering community as SCL tunnels play an increasingly important role in the delivery of the underground infrastructure which modern urban life demands In this second edition beyond a general updating to reflect new developments the sections on permanent sprayed concrete the innovative technology of spray applied waterproofing membranes fibre reinforcement both steel and macrosynthetic and composite lining design have been expanded Sustainability and environmental impact are addressed in a new section

Shotcrete E.S. Bernard,2020-12-17 A reference for shotcrete technologists and practitioners on this method of concrete placement and its great scope for adaptability optimization and error The text assesses laboratory research projects and also focusses on innovative developments in this field

Shotcrete: More Engineering Developments Erik Stefan Bernard,2004-09-15 Marking a crucial point in the sharing of research this cutting edge text spearheads advances in cross industry expertise Presenting papers addressing topics ranging from repair accreditation of nozzle men and early age performance to the blast resistance of shotcrete linings the work draws on contributions from individuals across the shotcret
