

WEEK 12: THE FUTURE OF POSITIVE PSYCHOLOGY

Future of Positive Psychology

Good

- Of 60 diagnosable disorders, 14 are now treatable and 2 are now curable.
- A science of mental illness was developed. Depression and alcoholism could now be measured and classified.
 - The causality of these mental illnesses could now be understood. Could look across time at genetics with some reliability

The science of mental illness

- Taxonomy and reliable diagnosis
- Measuring "fuzzy" concepts
- Discover causes by longitudinal and experimental methods
- Invent treatments (Tx and Rx)

Not Good

- Psychologists and psychiatrists became victimologists and pathologisers. View of human nature became if you were in trouble.
- Forgot people made choices and autonomy and that most people had lives and forgot to help people flourish.
- Forgot about helping people flourish, the goal of positive psychology.

Planning A Savouring Experience

Planning your savouring experience:

- Ask first for permission to "try something new" (like the miracle question)
 - Psychoeducate on why you think this could be helpful
1. Choose something enjoyable to savour: there are many kinds of positive enjoyable experiences that are worth savouring. It does not have to be something huge or particularly different to what you normally do. It could be visiting a museum, art gallery, sports game, beach, star gazing etc.
 2. Set aside some time for savouring: now work out a time that you could engage in the activity and spend Time savouring after the event (as well as during the event). Why would this particular time be suitable ?
 3. Gather materials needed: is there anything you need to take with you? Would you prefer to take a picnic lunch for example, rather than deal with the noise and expense of a cafe?
 4. Set out on your savouring experience: when you arrive at your destination engage in any practices/ rituals you use to set aside worries or concerns that may interfere with your experience. What do you need to be fully in the moment on your savouring experience?
 5. Saviour: try and identify exactly what it is that you find enjoyable about this activity. What do you see, hear and smell around you? How do you feel? Notice the moments of awe and wonder. Notice any

Positive Psychology: Theory, Research And Applications Hefferon, Kate, Boniwell, Ilona, 2011-05-01

Kate Hefferon and Ilona Boniwell have done an excellent job on this introduction to Positive Psychology I encourage educators students and everyone else interested in an updated well written and culturally balanced approach to the scientific study of human flourishing to read this highly accessible yet rigorously crafted text and to get it under your skin by ways of carefully chosen tests and exercises

Hans Henrik Knoop Aarhus University Denmark and President European Network for Positive Psychology This accessible yet comprehensive book provides an excellent new resource in the area of positive psychology Students researchers and practitioners alike will benefit from the skilful and lively integration of theory research and application The authors are prominent members of the international positive psychology movement and as such are able to deliver a confident practical and overarching assessment of the area integrated into psychology more widely

Angela Clow University of Westminster UK This is an exceptional book that synthesizes more than a decade of positive psychology research into chapters that are engaging accessible and educational Hefferon and Boniwell demonstrate a mastery of the literature through the ways in which they have marshaled the evidence from research and practice into this invaluable resource This book will become an essential reference guide for researchers educators and practitioners of positive psychology around the world

Professor Alex Linley Founding Director Capp This book is a valuable resource for students looking for an introduction to Positive Psychology but also wanting to get a comprehensive and updated overview of this innovative approach to the study of human behaviour and experience It provides a broad coverage of the most relevant theories and constructs developed within Positive Psychology and of their relevance for intervention and application in the most diverse life domains

Hefferon and Boniwell use a rigorous though accessible and friendly style of presentation By means of effective learning supports they stimulate readers active engagement in critical reflections on each topic The authors address the several issues and open questions which still characterize Positive Psychology as a relatively recent domain through a balanced and objective approach

Antonella Delle Fave University of Milano Italy Kate Hefferon and Ilona Boniwell have produced the first textbook which has set out purposefully to support students and teachers in higher education in the exciting new area of positive psychology The authors have experience of teaching the lectures described in each chapter and the book is written in a way that students will find engaging and fun Each chapter has clear learning objectives mock essay questions measurement tools summaries and a guide to further resources The content has been well researched and the early chapters cover the main concepts of positive psychology such as emotions happiness wellbeing optimism and resilience The later chapters are more novel and cover interventions and applications all with a critical eye Of particular note is the chapter on the body in positive psychology a topic which is frequently omitted from the thoughts and feelings approach of other texts in this area I would strongly recommend this book to all students and teachers of psychology
