**Morphing** Joseph Choma, 2015-01-19 Cylinders spheres and cubes are a small handful of shapes that can be defined by a single word However most shapes cannot be found in a dictionary They belong to an alternative plastic world defined by trigonometry a mathematical world where all shapes can be described under one systematic language and where any shape can transform into another This visually striking guidebook clearly and systematically lays out the basic foundation for using these mathematical transformations as design tools It is intended for architects designers and anyone with the curiosity to understand the link between shapes and the equations behind them Sol LeWitt Simon Starling, Sol LeWitt, 2009 Published to accompany MASS MoCA s landmark installation of LeWitt s innovative wall drawings this book celebrates the artist and his illustrious 50 year career Published in association with Mass MoCA Exhibition Schedule Mass MoCA North Adams Massachusetts opens November 16 2008 **The Tate Gallery 1984-86, Illustrated Catalogue of Acquisitions** Tate Gallery, 1988 Bauhaus Construct Jeffrey Saletnik, Robin Schuldenfrei, 2013-03-01 Reconsidering the status and meaning of Bauhaus objects in relation to the multiple re tellings of the school s history this volume positions art objects of the Bauhaus within the theoretical artistic historical and cultural concerns in which they were produced and received Contributions from leading scholars writing in the field today including Frederic J Schwartz Magdalena Droste and Alina Payne offer an entirely new treatment of the Bauhaus Issues such as art and design pedagogy the practice of photography copyright law and critical theory are discussed Through a strong thematic structure new archival research and innovative methodologies the questions and subsequent conclusions presented here re examine the history of the Bauhaus and its continuing legacy Essential reading for anyone studying the Bauhaus modern art and design *Sol Lewitt*, 1973 **Sol Lewitt Books, 1966-1990** Sol LeWitt, 1990 **Aspects** Edward A. Vazquez, 2018-01-02 Stretching lengths of yarn across interior spaces American artist Fred Sandback 1943 2003 created expansive works that underscore the physical presence of the viewer This book the first major study of Sandback explores the full range of his art which not only disrupts traditional conceptions of material

presence but also stages an ethics of interaction between object and observer Drawing on Sandback's substantial archive Edward A Vazquez demonstrates that the artist's work with all its physical slightness and attentiveness to place as well as its relationship to minimal and conceptual art of the 1960s creates a link between viewers and space that is best understood as sculptural even as it almost surpasses physical form At the same time the economy of Sandback's site determined practice draws viewers focus to their connection to space and others sharing it As Vazquez shows Sandback's art aims for nothing less than a total recalibration of the senses as the spectator is caught on neither one side nor the other of an object or space but powerfully within it
