The Deepcut Review Nicholas Blake, Deepcut Review, 2006-03-29 Nicholas Blake QC was appointed on 15th December 2004 to review the circumstances surrounding the deaths of four soldiers at Deepcut between 1995 and 2002 The Review covers in detail the deaths of three soldiers Sean Benton Cheryl James and Geoff Gray the fourth death that of James Collinson was subject to an outstanding inquest and so was not investigated in detail nor are the inquest results The Review also deals with aspects of Army policy on recruitment and training over a ten year period and matters relating to the Training Regiment at Deepcut The review has concluded that on the balance of probabilities the deaths of Sean Benton Cheryl James and Geoff Gray were self inflicted and that the opportunity for self infliction was afforded by the policy of frequently assigning trainees to armed guard duty at Deepcut unsupervised by experienced soldiers or members of the Military Provost Guard The Review does not feel that a public inquiry into the immediate or broader events surrounding the deaths is necessary Sean Benton who had attempted self harm on at least two occasions in the months before he died had had disciplinary problems in his Army career had been notified that his discharge from the Army was being applied for and had previously been denied access to a weapon on guard duty on the day of his death he obtained the weapon from another trainee under false pretences There was no evidence that Cheryl James or Geoff Gray posed a risk of self harm and no certainty as to what might have led them to their actions They had both performed frequent armed guard duties at remote locations which might have made them unhappy and combined with other personal factors may have made them more susceptible to self harm at the time of their deaths There was no evidence of bullying in any of the three cases Factors contributing to the deaths might have been the training environment at Deepcut causing low morale through poor accommodation limited recreational facilities and the balance between privacy and dormitory life unsupervised access to weapons supervision of trainees discipline bullying and informal sanctions ventilation of grievances poor instructors The Review makes 34 recommendations covering recruitment screening of recruits and parental involvement training for minors and the length of training provisions for minors during training supervisory ratios the quality of instructors information on standards of conduct collective responsibility making and responding to complaints investigating complaints record keeping an ombudsman for the armed forces guard duty sudden deaths disclosure and confidentiality whether there is a need for a public inquiry

Surviving Violent Crime and the Criminal Injuries Compensation Authority Simon Duckett, 2003

Hit List Richard Belzer, David Wayne, 2016-06-07 Richard Belzer and David Wayne are back to set the record straight after Dead Wrong this time they re going to uncover the truth about the many

witness deaths tied to the JFK assassination For decades government pundits have dismissed these coincidental deaths even regarding them as myths as urban legends Like most people Richard and David were initially unsure about what to make of these coincidences After all events don't consult the odds prior to happening they simply happen Then someone comes along later and figures out what the odds of it happening were Some of the deaths seemed purely coincidental heart attacks hunting accidents Others clearly seemed noteworthy witnesses who did seem to know something and did seem to die mysteriously Hit List is a fair examination of the evidence of each case leading to necessarily different conclusions The findings were absolutely staggering as some cases were clearly linked to a clean up operation after the murder of President Kennedy while others were the result of other forces The impeccable research and writing of Richard Belzer and David Wayne show that if the government is trying to hide anything they're the duo who will uncover it

Postmortem Stefan Timmermans, 2007-04-15 As elected coroners came to be replaced by medical examiners with scientific training the American public became fascinated with their work From the grisly investigations showcased on highly rated television shows like C S I to the bestselling mysteries that revolve around forensic science medical examiners have never been so visible or compelling They and they alone solve the riddle of suspicious death and the existential questions that come with it Why did someone die Could it have been prevented Should someone be held accountable What are the implications of ruling a death a suicide a homicide or an accident Can medical examiners unmask the perfect crime Postmortem goes deep inside the world of medical examiners to uncover the intricate web of pathological social legal and moral issues in which they operate Stefan Timmermans spent years in a medical examiner's office following cases interviewing examiners and watching autopsies While he relates fascinating cases here he is also more broadly interested in the cultural authority and responsibilities that come with being a medical examiner Although these professionals attempt to remain objective medical examiners are nonetheless responsible for evaluating subtle human intentions Consequently they may end or start criminal investigations issue public health alerts and even cause financial gain or harm to survivors How medical examiners speak to the living on behalf of the dead is Timmermans's subject revealed here in the day to day lives of the examiners themselves
