Nanotechnology in Textile Dyeing and Printing Satyaranjan Bairagi,S. Wazed

Ali, Shakeel Ahmed, 2025-12-01 Nanotechnology in Textile Dyeing and Printing explores the latest advancements in nanotechnology and its application in creating innovative functional textiles with advanced coloration properties. It discusses the future potential of nanotechnology in textile dyeing and printing, examining its impact on the textile industry. Additionally, it addresses ethical and environmental considerations associated with the use of advanced technology in textile production. The book starts by providing an overview of the fundamentals of nanotechnology pertinent to the textile dyeing and printing. It then features various types of nano-based dyes and pigments, including those based on nanoparticles, quantum dots, and other advanced materials currently in development. The exploration extends to how these nano-based dyes and pigments are employed to create new advanced coloration effects in textiles. Examples from different areas such as fashion, interior design, and technical textiles are included. This book serves as an essential guide for those seeking to understand the cutting-edge technology shaping the future of textile dyeing and printing. Presents a detailed examination of the various types of nano-based dyes and pigments currently in development, including those based on nanoparticles, quantum dots, and other advanced materials. Addresses ethical and environmental considerations associated with the use of advanced technology in textile production. Serves as a valuable resource for researchers and professionals in the textile industry looking to stay current on the latest advancements in nanotechnology and its application in textile dyeing and printing.
