Washingtons America:

George Washington and the American Military Tradition Don Higginbotham, 1987-10-01 In George Washington and the American Military Tradition Don Higginbotham investigates the interplay of militiaman and professional soldier of soldier and legislator that shaped George Washington's military career and ultimately fostered the victory that brought independence to our nation Higginbotham then explores the legacy of Washington's success revealing that the crucial blending of civil and military concerns characteristic of the Revolution has been variously regarded and only seldom repeated by later generations of American soldiers Washington's training between 1753 and 1755 included frontier command in the Virginia militia adjunct service to the British regulars during the French and Indian War and increasing civil service in the Virginia House of Burgesses and Continental Congress The result of this combination of pursuits was Washington's concern for the citizen behind the soldier his appreciation of both frontier tactics and professional discipline and his sensitivity to political conflict and consensus in thirteen colonies in forming a new united nation When in 1775 Washington accepted command of the Continental Army from the Continental Congress he possessed political and military experience that enabled him by 1783 to translate the Declaration of Independence into victory over the British Yet Higginbotham notes the legacy of Washington's success has sometimes been overlooked by generals concerned with professional training and a permanent military establishment and therefore apt to revere foreign heroes such as Jomini Napoleon and Bismarck more than Washington Other leaders most notably the World War II chief of staff George Marshall have recognized and implemented Washington's unique understanding of civil and military coordination In times almost wholly dominated by a military agenda Washington's and Marshall's steady subordination of soldier to citizen of strategy to legislation recalls the careful consensus of thirteen colonies in 1776 *The American Presidents, Washington to Tyler* Robert A. Nowlan, 2014-01-10 As of 2012 only 43 men have held the office of the President of the United States Some have been sanctified and some reviled This historical work addresses the careers of the first ten presidents men who made vital contributions not only to the office of the presidency but to the course of the fledgling nation From Washington through Tyler every term is recounted in detail and each presidential profile provides as many as a hundred quotations with full source notes by the president his friends family historians and others Each profile ends with an extensive bibliography of books about the president his principles and policies and also provides suggestion for further reading Rigorously nonpartisan in approach this detail rich text describes the early years of what may well be one of the most demanding jobs in the world **Marlborough's America** Stephen Saunders Webb, 2012-01-08 Scholars of British America generally conclude that the early eighteenth century Anglo American empire was commercial in economics liberal in politics and parochial in policy somnambulant in an era of salutary neglect but Stephen Saunders Webb here demonstrates that the American provinces under the spur of war became capitalist coercive and aggressive owing to the vigorous leadership of career army officers trained and nominated to American

government by the captain general of the allied armies the first duke of Marlborough and that his influence and that of his legates prevailed through the entire century in America Webb's work follows the duke whom an eloquent enemy described as the greatest statesman and the greatest general that this country or any other country has produced his staff and soldiers through the ten campaigns which by defanging France made the union with Scotland possible and made Great Britain preeminent in the Atlantic world Then Webb demonstrates that the duke's legates transformed American colonies into provinces of empire Marlborough's America fifty years in the making is the fourth volume of The Governors General The Greenwood Encyclopedia of Daily Life in America Randall M.
