Barbour, 2000-05-16 The Definitive Introduction To The Relationship Between Religion And Science In The Beginning Why Did the Big Bang Occur Quantum Physics A Challenge to Our Assumptions About Reality Darwin And Genesis Is Evolution God s Way of Creating Human Nature Are We Determined by Our Genes God And Nature Can God Act in a Law Bound World Over the centuries and into the new millennium scientists theologians and the general public have shared many questions about the implications of scientific discoveries for religious faith Nuclear physicist and theologian Ian Barbour winner of the 1999 Templeton Prize for Progress in Religion for his pioneering role in advancing the study of religion and science presents a clear contemporary introduction to the essential issues ideas and solutions in the relationship between religion and science In simple straightforward language Barbour explores the fascinating topics that illuminate the critical encounter of the spiritual and quantitative dimensions of life

The Encounter of Faith and Science in Inter-religious Dialogue Sarojini Henry, 2005 **Science Meets Religion** Irvin H. Myers, 1953 Philosophy Culture and Vision: African Perspectives Gyekye, Kwame, 2014-05-08 Believing that the intellectual enterprise called philosophy is essentially a part of the cultural as well as historical experience of a people that the concepts and problems that occupy the attention of philosophers placed in different cultural spaces or historical times generally derive directly from those spaces and times and that philosophy in turn has been most relevant to the development of human cultures the Ghanaian philosopher Kwame Gyekye gives reflective attention in this book to some of the concepts and problems that in his view feature most prominently in the contemporary African cultural social political and moral experience Such concepts and problems include the following political legitimacy development culture and the pursuit of science and technology political corruption democracy representation and the politics of inclusion the status of cultural values in national orientation understanding globalization and others It is these topics that are covered in the essays collected in this book The unrelenting pursuit of the speculative activity by the philosopher in most cases eventuates in normative proposals these normative proposals often embody a vision a vision of an ideal human society in terms of its values politics and culture Vision understood here has human not supernatural or divine origination and involvement and requires action by human beings in order for it to come into reality A vision may derive from sustained critical evaluation of a culture

or some elements of it Gyekye attempts an articulation of the visions of the essays contained in the book Even though philosophical ideas and concerns are originally inspired by and worked out in a cultural milieu it does not necessarily follow Gyekye strongly believes that the relevance of those ideas and insights is to be tethered to the cultures that produced them For more often than not the relevance of those ideas or at least some of them transcends the confines of their own times and cultures and can be appreciated by other societies or cultures or generational epochs This trans cultural or trans epochal or meta contextual appeal or attraction of philosophical ideas and insights spawned by a particular culture or cluster of cultures or in specific historical times is to be put down to our common human nature including our basic human desires and aspirations Thus most of the essays published here should be of interest to the global community i e to cultures and societies beyond the African

When Science Meets Religion Patrick D. Harrington, 2011-12 This is without doubt the most important book of the 21st century Based on string theory but with one simple refinement this book solves the mystery of quantum entanglement and at the same time has God logically fall out of the equations It offers an obvious solution to dark energy It explains where the anti matter went that existed in the early universe and it gives the answer to why time only moves forward Plus it's all easy to understand It derives vastly important philosophical implications and ethics directly from the science that matches perfectly with what religion has been stating all along If you live in the 21st century and want to understand how this universe works and what humanity's role and your vital individual role is in it then you require this book
