Compassion: From Neuroscience to New Horizons and Innovative, Inclusive Research Agendas Kathryn Waddington, Julian Manley, Trudi Edginton, Jason Kanov, 2024-01-11 The nature and science of compassion encompasses many

aspects of human behavior social and organizational experience with resultant debate about its definition meaning and application Research theorizing and scholarship is spread across a wide range of methodological disciplinary historical and cultural perspectives including psychology sociology psychosocial studies organizational science inter national politics and evolutionary studies Global concerns relating to the climate crisis COVID 19 pandemic and mass movements of displaced people all point to an urgent need for compassion in all human interactions New and innovative interdisciplinary approaches agendas and paradigms are needed to both compliment and critique existing understandings of the meaning and applications of compassion in all its diverse and complex forms In a world where there appears to be increasing demand for simplification and quantification from governments and policy makers questions must be asked about what this means for psychology and social science research The tendency towards post positivist reductionism has led to critiques that universities have become factories that produce sterile derivative unimaginative writing 21st century universities have been described as anxiety machines lacking in compassion and creating more competition and stress than knowledge Arguably research into compassion should take place in compassionate disciplinary and institutional cultures We all have a role to play in addressing the lack of compassion in universities which will involve an institutional level shift from individual level competition to group level collaboration Importantly recent advances in compassion research promise gains in understanding in both the science and neuroscience of human experience and in applications of that work to improve humankind and the world around us Qualitative research in psychology and psychosocial approaches although becoming more visible still remain a minority endeavor within the discipline This Research Topic offers the opportunity to foreground the values and virtues of qualitative psychology alongside more tried and tested approaches
