Writing Word Patterns:

How Students Write: A Linguistic Analysis Laura Louise Aull, 2020-04-01 Broad generalizations about people today are a familiar feature of first year student writing. How Students Write brings a fresh perspective to this perennial observation using corpus linguistics techniques. This study analyzes sentence level patterns in student writing to develop an understanding of how students present evidence, draw connections between ideas, relate to their readers, and ultimately learn to construct knowledge in their writing. Drawing on both first year and upper level student writing, the book examines the discourse of students at different points in their education. It also distinguishes between argumentative and analytic essays to explore the way school genres and assignments shape students' choices. In focusing on sentence level features such as hedges, perhaps, and boosters, this study shows how such rhetorical choices work together to open or close opportunities for thoughtful exchanges of ideas. Attention to these features can help instructors foster civil discourse, design effective assignments, and expose and question norms of higher education. Words and Patterns Katharine M. Day, 1970

Mastering High-Frequency Words Joan Westley, 2024-12-31 The 180 Lessons in this sequential system of daily word work will help students develop fluency in reading and writing high frequency words. They will talk about the words, look for special features, use letters to build the words, and write them. Includes blackline masters to copy letters, word tiles, and header cards. Many teachers use word walls to display high frequency words; they are hoping their students will soon master them. The words are usually listed in alphabetical order for easy reference. Whenever students need to use one of these words in their writing, they can simply find its correct spelling on the word wall. Most teachers find this to be an effective way to remind students how these difficult words are spelled. However, word walls on their own are not sufficient to guide students to word mastery. To make word walls really work requires more than just putting the words up on the wall. The words need to be systematically introduced, taught, and reinforced over time. That is what Word Wall Work is all about. **Shaping Literate Minds** Linda Dorn, Carla Soffos, 2023-10-10 How can teachers create a literacy curriculum that builds processing links between reading, writing, and spelling knowledge? In Shaping Literate Minds: Developing Self-Regulated Learners, Linda J. Dorn and Carla Soffos illustrate how processing theory can be applied to the everyday practices of classroom teaching. If instruction emphasizes the interrelationships of these three language areas, students learn how to transfer knowledge, skills, and strategies across literacy events. This is complex theory, but the authors provide clear and practical examples to support teachers as they incorporate these ideas into their classroom practices. Grounded in authentic experiences from primary classrooms, this book provides explanations of processing behaviors among reading, writing, and spelling knowledge; observational tools that support teachers in noticing changes over time in specific literacy behaviors; guidance on creating conditions for developing self-regulated learners; authentic reading and writing samples and teacher-student interactions; figures and pictures that clearly describe how teachers can use assessment to inform and guide instruction with
