Green Software Defined Radios Liesbet Van der Perre,Jan Craninckx,Antoine Dejonghe,2008-12-21 Green Software Defined Radios the title of this book may have originated from a lack of inspiration and the combination of hard work jetlag and drinking green tea The message we want to convey however is that SDRs are a promising technology for the future providing they are designed for efficient usage of scarce resources energy and spectrum In the last years the R D teams focusing on wireless communication around the world and at IMEC specially have realized great breakthroughs It is our honor building on this knowledge to bring a comprehensive overview of the essential technologies We are grateful that Springer is willing to publish in their collection on radio technologies a book on green SDRs a weird species still today yet maybe the baseline for the day after tomorrow Dear reader we wish that you find in the following pages including the references some interesting insights and that this book may live more or less up to your expectations and hopefully more than less This book is closing state that the quest for Green SDR has not ended this is just the beginning Concerning this book however we are happy that today the opposite is true We want to acknowledge our colleagues at IMEC for their great scientific contribution and even more for the enjoyable cooperation
