Software Engineering Education:

Software Engineering Education Norman E. Gibbs, Richard E. Fairley, 2012-12-06 Focus on masters level education in software engineering Topics discussed include software engineering principles current software engineering curricula experiences with existing courses and the future of software engineering education **Software Engineering Education**

A.I. Wasserman, P. Freeman, 2012-12-06 Software engineering is a term which was coined in the late 1960s as the theme for a workshop on the problems involved in producing software that could be developed economically and would run reliably on real machines Even now software engineering is more of a wish than a reality but the last few years have seen an increased awareness of the need to apply an engineering type discipline to the design and construction of software systems Many new proposals have been made for the management of software development and maintenance and many methodologies have been suggested for improving the programming process As these problems and solutions become better understood there is a growing need to teach these concepts to students and to practicing professionals As a prelude to the educational process it is necessary to gain an understanding of the software design and development process in industry and government to define the appropriate job categories and to identify the fundamental content areas of software engineering The need for quality education in software engineering is now recognized by practitioners and educators alike and various educational endeavors in this area are now being formulated Yet discussions we had had over the past year or so led us to believe that there was insufficient contact between practitioners and educators with the resultant danger that each group would go off in separate ways rather than working together **Software Engineering Education for a Global E-Service Economy** Gianmario Motta, Bing Wu, 2014-02-18 This book presents and discusses the state of the art and future trends in software engineering education It introduces new and innovative methods models and frameworks to focus the training towards the needs and requirements of the industry Topics included in this book are education models for software engineering development of the software engineering discipline innovation and evaluation of software engineering education curriculum for software engineering education requirements and cultivation of outstanding software engineers for the future and cooperation models for industries and software engineering education *Software Engineering Education in the Modern Age* Paola Inverardi, Mehdi Jazayeri, 2006-12-15 This tutorial book presents an augmented selection of the material presented at the Software Engineering Education and Training Track at the International Conference on Software Engineering ICSE 2005 held in St Louis MO USA in May 2005 The 12 tutorial lectures presented cover software engineering education state of the art and practice creativity and rigor challenges for industries and academia as well as future directions *Overcoming Challenges in Software Engineering Education: Delivering Non-Technical Knowledge and Skills* Yu, Ligu, 2014-03-31 Computer science graduates often find software engineering knowledge and skills are more in demand after they join the industry However given the lecture based curriculum present in academia it is not an easy undertaking to deliver industry

standard knowledge and skills in a software engineering classroom as such lectures hardly engage or convince students

Overcoming Challenges in Software Engineering Education Delivering Non Technical Knowledge and Skills combines recent advances and best practices to improve the curriculum of software engineering education This book is an essential reference source for researchers and educators seeking to bridge the gap between industry expectations and what academia can provide in software engineering education

Eleventh Conference on Software Engineering Education & Training Conference on Software Engineering Education and Training,1998 Papers proceeding from the 11th Software Engineering and Training Conference held in 1998 The volume is aimed at researchers practitioners and students in software design and development

Software Engineering Education Rosalind L. Ibrahim,1995-02-17 This volume constitutes the proceedings of the 8th Conference on Software Engineering Education SEI CSEE 1995 held in New Orleans Louisiana USA in March April 1995 The volume presents 25 carefully selected full papers by researchers educators trainers and managers from the relevant academic industrial and governmental communities in addition there are abstracts of keynote speeches panels and tutorials The topics covered include curriculum issues Goals what should we be teaching Process issues Software engineering in special domains Requirements and designs People management and leadership skills Technology issues Education and training needs and trends

A Progress Report on Undergraduate Software Engineering Education Gary A. Ford,Software Engineering Institute,1993 Abstract The current status of undergraduate software engineering education in United States universities is summarized including descriptions of programs at eleven schools Possible scenarios for the further evolution of undergraduate software engineering programs are described based on observations of the evolution of computer science and computer engineering programs Recent and ongoing activities of the Computer Society of the Institute of Electrical and Electronics Engineers IEEE and the Association for Computing Machinery ACM regarding the establishment of the profession of software engineering are described including the expected implications for undergraduate software engineering education

Software Engineering Education Carol Sledge,1992 This book presents the proceedings of the sixth annual conference on software engineering education and training sponsored by the Software Engineering Institute SEI and held in cooperation with the ACM and the IEEE Computer Society The book includes refereed papers from an international group of software engineering educators along with reports from the SEI panel discussions and papers from invited speakers The book is aimed at three audience groups academia industry and government The material targets academic educators and practitioner trainers and many of the paperswill interest multiple groups Several of the papers focus on the theme of the 1992 conference putting the engineering into software engineering These papers address various aspects involved in applying the principles and methods

of traditional engineering disciplines to software engineering The book presents state of the art and state of the practice work in software engineering education and training PUBLISHER S WEBSITE [Software Engineering Education](#) Norman E. Gibbs,1989-07-24 This volume is a record of two events held in Pittsburgh Pennsylvania as part of the SEI Software Engineering Education and Training Week in July 18 21 1989 The first section includes 15 refereed papers presented at the Third SEI Conference on Software Engineering Education and the SEI Education Program s annual revised report on Master Software Engineering curriculum recommendations The second part contains unrefereed position papers submitted by participants in the SEI Workshop on an Undergraduate Software Engineering Curriculum The annual SEI Conference on Software Engineering Education brings together educators from universities industry and government to discuss problems and issues of mutual interest Its goals are to stimulate new educational approaches to provide a forum for discussions of mutual problems and to evaluate promising new ideas The topics of the papers are industry issues and programs teaching software maintenance undergraduate software engineering education and related topics [A Progress Report on Undergraduate Software Engineering Education](#) Gary Ford,1994 Abstract The current status of undergraduate software engineering education in United States universities is summarized including descriptions of programs at eleven schools Possible scenarios for the further evolution of undergraduate software engineering programs are described based on observations of the evolution of computer science and computer engineering programs Recent and ongoing activities of the Computer Society of the Institute of Electrical and Electronics Engineers IEEE and the Association for Computing Machinery ACM regarding the establishment of the profession of software engineering are described including the expected implications for undergraduate software engineering education [Software Engineering Education](#) Gary A. Frontiers in Software Engineering Education Jean-Michel Bruel,Alfredo Capozucca,Manuel Mazzara,Bertrand Meyer,Alexandr Naumchev,Andrey Sadovykh,2020-08-11 This book constitutes invited papers from the First International Workshop on Frontiers in Software Engineering Education FISEE 2019 which took place during November 11 13 2019 at the Chateau de Villebrumier France The 25 papers included in this volume were considerably enhanced after the conference and during two different peer review phases The contributions cover a wide range of problems in teaching software engineering and are organized in the following sections Course experience lessons learnt curriculum and course design competitions and workshops empirical studies tools and automation globalization of education and learning by doing The final part TOOLS Workshop Artificial and Natural Tools ANT contains submissions presented at a different but related workshop run at Innopolis University Russia in the context of the TOOLS 2019 conference FISEE 2019 is part of a series of scientific events held at the new LASER center in Villebrumier near Montauban and Toulouse France **Issues in Software Engineering Education** Richard Fairley,Peter Freeman,2012-12-06 This volume combines the proceedings of the 1987 SEI Conference on Software Engineering Education held in Monroeville Pennsylvania on April 30 and May 1 1987 with the set of papers that

formed the basis for that conference The conference was sponsored by the Software Engineering Institute SEI of Carnegie Mellon University SEI is a federally funded research and development center established by the United States Department of Defense to improve the state of software technology The Education Division of SEI is charged with improving the state of software engineering education This is the third volume on software engineering education to be published by Springer Verlag The first Software Engineering Education Needs and Objectives edited by Tony Wasserman and Peter Freeman was published in 1976 That volume documented a workshop in which educators and industrialists explored needs and objectives in software engineering education The second volume Software Engineering Education The Educational Needs of the Software Community edited by Norm Gibbs and Richard Fairley was published in 1986 The 1986 volume contained the proceedings of a limited attendance workshop held at SEI and sponsored by SEI and Wang Institute In contrast to the 1986 Workshop which was limited in attendance to 35 participants the 1987 Conference attracted approximately 180 participants

Software Engineering Education James E. Tomayko, 1991 The Fifth SEI Conference on Software Engineering was held in Pittsburgh Pennsylvania October 7 8 1991 This annual conference is a forum for discussion of software engineering education and training among members of the academic industry and government communities It is funded by the Education Program of the Software Engineering Institute a federally funded research and development center of the U S Department of Defense For the first time in 1991 it was held in conjunction with the Association for Computing Machinery and the IEEE Computer Society Seven sessions addressed software project courses software engineering training in government and industry curriculum issues software engineering teaching styles teaching design topics in real time and environments and developing software engineering expertise PUBLISHER S WEBSITE *Software Engineering Education* A.
