Tesla Marko Perko, Stephen M Stahl, 2022-05-01 The enigmatic Nikola Tesla stalked by his ever present inner demons invents the modern world His astonishing story is that of a new age god a genius a Zeus a wonderful Wizard yet a deeply troubled one He tames the mysterious force called electricity he dazzles the world with his endless inventions and discoveries he blazes new paths in science that profoundly impact our daily lives he turns fantasies into realities his thought experiments disrupt scientific norms he gives us many of the indispensable tools we use today and famous actresses and chanteuses clamor for his attention as powerful men desire to be his friend all before an astonished world Yet all the while he keeps his own counsel as he simultaneously struggles with the challenging consequences of bipolar disorder flights of manic energy alternating with depressive depths of great despair He shuns the clichés of a quotidian life while forever seeking to lift the burdens from the shoulders of mankind It would become his lifelong leitmotif but at what cost to him The authors Marko Perko and Stephen M Stahl M D Ph D D Sc propose a new style biography entitled T E S L A His Tremendous and Troubled Life They will examine Nikola Tesla in a manner that has yet to be accomplished in publishing history asking and answering the seminal question Who was the real man with an extremely complex psyche personality who lived with obsessive compulsive disorder OCD and a hyperthymic temperament spilling over at times into high flying bipolar mania and then crashing into devastating depression and not simply the iconoclastic scientist who invented the modern world

Impending World Oil Shortage With respect to these I feel that TPO is less irrelevantly philosophical than Hartmann's book more up to date and more pointedly technical in sources used very similar to the first half of Rifkin's work where he delineates the problem but again a more comprehensive and at the same time more focused presentation The second half of Rifkin's work where he cheerleads in rather political mode for a salvaging of the world's economy via distributed hydrogen fuel cell infrastructure is not directly relevant except I suppose inasmuch as it would seem to contradict Heinberg's skepticism about propping up global industrial civilization through a 11th hour switch to alternatives I'd personally go with Heinberg's conclusions again in topic coverage very similar to Deffeye's quite interesting work but frankly for those who want a quick and focused rollup presentation package for opening the topic with others Deffeye's work is overly encumbered with too much aranca about oil geology and personal author's memoirs Overall The Party's Over will serve as the state of the art topic opener on Hubbert catastrophism for people on this list well into the foreseeable future Scott Meredith AlasBabylon list owner
