their household Teddy's mother died in a tragic car accident. On the one year anniversary of her death, Teddy's stoic father plays his wife's favorite lottery numbers in a tender, uncharacteristic act. When it turns out that the family holds the 190 million winning ticket, their world is instantly transformed. Seemingly overnight, a host of colorful characters demands their attention, including Teddy's hilarious aunt and uncle, a beautiful divorcee, a desperate former soap opera star, and a menacing stranger who threatens the very core of the family. As events spiral out of control, the family struggles to discover what the rich part of life really is. Featuring a unique father-child bond, Jim Kokoris's moving first novel is flavored with the rich characterizations and poignant charm of early John Irving. Creating the perfect balance of humor and pathos, Kokoris takes us on an unforgettable journey through the ups and downs of this revelation of unexpected wealth.

Price Theory and Applications Steven E. Landsburg, 1999. By the author of *The Armchair Economist*, this text aims to make intermediate microeconomics fun and intellectually challenging. The writing style provides a friendly presentation with many applications combined with a careful development of microeconomics theory. All of the standard topics of intermediate price theory are included, as well as many topics such as alternative normative criteria, efficient asset markets, contestable markets, antitrust law, human capital, demand for public goods, and more. A unifying theme of social welfare is used throughout. The inclusion of higher level mathematics is minimal.
