**A Bibliography on Writing and Written Language** Konrad Ehlich, Florian Coulmas, Gabriele Graefen, 2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years No comprehensive bibliography on this subject has been published since Sattler's 1935 handbook With a selection of some 27 500 titles it covers the most important literature in all scientific fields relating to writing Emphasis has been placed on the interdisciplinary organization of the bibliography creating many points of common interest for literacy experts educationalists psychologists sociologists linguists cultural anthropologists and historians The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field While necessarily selective it also offers information on more specialized bibliographies In addition an overview of norms and standards concerning script and writing will prove very useful for non professional readers It is therefore also of interest to the generally interested public as a reference work for the humanities

**Constructing Interpersonality** Enrique Lafuente-Millán, Rosa Lorés-Sanz, Pilar Mur-Deñas, 2010-02-19 The view that academic discourse is by definition impersonal has long been superseded It seems unquestionable now that the interpersonal component of texts that is the ways in which the writers project themselves and their audience in the discourse is an essential factor determining the success of scholarly communication and has become a fundamental issue in the field of English for Academic Purposes EAP Interpersonality is the key issue around which the articles in this edited book focus on The eighteen contributions included in this volume provide a wide exploratory view of the many academic genres in which interpersonality is manifested and the various analytical approaches from which the textual manifestation of that interpersonality can be studied The varied origin of the contributors is also representative of the global interest that the issue of interpersonality arouses in the field of academic discourse analysis at an international level The present volume constitutes a highly valuable tool for applied linguists and discourse analysts with an interest in EAP as well as for students instructors and language teachers interested in academic discourse The book may also be of interest to other agents intervening in the research publication process such as translators proofreaders reviewers and editors
