## **Wrong Mirror:**

*The Wrong Mirror* Emma Darcy, 1986      **We Are Tam** Patricia Bernard, 2004-02 Tam's ordinary school day explodes when a voice inside her head sings her name. The voice belongs to Tameron, a mirror image twin living five hundred years in the future whose brilliant father is dying. Only Tam and her sceptical brother Steven can bridge the centuries, decode a forbidden time capsule, and outrun giant snow white mosquitoes that freeze history itself. *We Are Tam* is a fast paced middle grade adventure packed with telepathic twists, brother sister banter, and big questions about why the past matters. Perfect for readers who loved *A Wrinkle in Time* and *When You Reach Me*.

Mirror, Mirror Mark Pendergrast, 2009-04-28 Of all human inventions the mirror is perhaps the one most closely connected to our own consciousness. As our first technology for contemplation of the self, the mirror is arguably as important an invention as the wheel. *Mirror Mirror* is the fascinating story of the mirror's invention, refinement, and use in an astonishing range of human activities, from the fantastic mirrored rooms that wealthy Romans created for their orgies to the mirror's key role in the use and understanding of light. Pendergrast spins tales of the 2,500-year mystery of whether Archimedes and his burning mirror really set faraway Roman ships on fire, the medieval Venetian glassmakers who perfected the technique of making large flat mirrors from clear glass, and for whom any attempt to leave their cloistered island was punishable by death; Isaac Newton whose experiments with sunlight on mirrors once left him blinded for three days; the artist David Hockney who holds controversial ideas about Renaissance artists and their use of optical devices; and George Ellery Hale, the manic depressive astronomer and telescope enthusiast who inspired and gave his name to the twentieth century's largest ground based telescope. Like mirrors themselves, *Mirror Mirror* is a book of endless wonder and fascination.

Thrilled to Death Lynne Tillman, 2026-03-24 A New York Times Book Review Editors Choice. From award winning novelist and cultural critic Lynne Tillman, *Thrilled to Death* is a collection of selected stories across the career of America's most audacious writer. Among the vanguard of American literary writers, Lynne Tillman's work has defied categorization throughout her legendary career, a singular body of work that both redefined and reimagined the short story form entirely. Curated by the author, *Thrilled to Death* is the definitive entry point for both established fans and new readers alike. These selected stories collect a bold, playful, and eclectic ensemble of Tillman's Borgesian fictions that span decades and traverse themes of sex, death, memory, and anxiety. With argumentative wit, Tillman's meditations and reflections on art, politics, and culture are animated by deliciously paradoxical characters who desire and fret in turn, and who are imbued with searing intelligence and dolorous ambivalence. Describing Tillman's writing, Colm Tóibín says, "Her style has both tone and undertone; it attempts to register the impossibility of saying very much, but it insists on the right to say a little. So what is essential is the voice itself, its ways of knowing and unknowing."

Baconiana, 1893      *Reflecting Telescope Optics II* Raymond N. Wilson, 2001-07-17 This book, written by the designer of the world's largest telescope, the VLT in Chile, covers the essential modern developments in telescope optics. In the last twenty years, modern technology has revolutionized not only

manufacturing and test procedures but also the entire area of quality specification In addition to these topics the book also covers the alignment of telescope optics atmospheric optics adaptive optics reflective coatings and ancillary equipment Richly illustrated this work covers important modern techniques which makes it one of the most complete references on telescope optics
